The Business School is an area of the College that is expanding its teaching and research programme due to the high demand for the school's courses. To meet this demand a phased plan to deliver 2992m² space is required. The first phase to provide the floor space is to refurbish areas in the ACE Extension Building on Levels 3, 4 and 5 which will provide 644m².

The project when completed will allow the Business School to expand its taught postgraduate programme by:
- Introducing a new MSc in Marketing
- Adding 64 students to its MSc in Finance
- Adding 54 students to its MSc in Risk Management and Financial Engineering

The proposal is to demolish the existing structure which sits on the roof of ACE Extension on Level 5 and then build a new double height structure which will accommodate two lecture theatres each holding approximately 80 students. A soundproof partition will separate the two lecture theatres which can be removed in the future to create one large space.

Light wells at the rear of the building will be infilled to increase floor area on each of levels 3, 4 and 5. This new floor area will provide PhD Student spaces on Level 3 and 4; new toilet facilities and a fire exit will also be installed.
