Project Brief:

**Wolfson Education Centre/CSC Imaging**
The Faculty of Medicine proposes to transform the present Wolfson Conference Centre into the ‘Wolfson Education Centre’ which will form a focal point in enabling us to drive forward a vision for an academic medical research and education centre at Hammersmith.

The Centre will provide the accommodation required for the new graduate-level entry medicine course, as well as for the new BSc Biomedical Sciences Degree course. In addition, with imaginative design, the Centre will provide a focal point for meetings and conferences at the campus. There are no other such facilities currently on site.

The Faculty of Medicine is one of Europe's largest medical institutions in terms of its staff and student population and its research income. Over 700 Faculty members are active in research, with an annual research income of over £100 million.

For further information on the Faculty of Medicine please visit: [http://www.imperial.ac.uk/medicine/](http://www.imperial.ac.uk/medicine/)

Project Update:

- Works completed January 2009 and building is now in use
- Currently in Defects period
