Quick guide to adding a Reading List in BlackBoard

1. Select Tools from the drop down menu.
2. Make sure the edit function is on.
3. Select Reading List from the options.
Configure Tool: Reading List

The Basic LTI tool allows connections to any compliant external tools.

Enter the details to appear on the content page for this link.

* Indicates a required field. Indicates unsaved changes.

** Name

Add a name. This will be what displays to students in BlackBoard. You can also add a description below if you want to add a little more detail.

Year 1 reading list

Title of content item

When you've added all the information, click Submit.

There are other settings on this page. You do not need to change any of the other settings; these have been pre-configured to work with the reading list system.
The Reading List then displays to the students like this in BlackBoard. Students can click this and will see the Reading List in the BlackBoard window.

<table>
<thead>
<tr>
<th>Content</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Test" /></td>
</tr>
<tr>
<td><img src="image" alt="Year 1 reading list" /></td>
</tr>
<tr>
<td>This list has all your compulsory and mandatory reading required for this course.</td>
</tr>
</tbody>
</table>
