Welcome to the launch of the Centre for International Child Health

Imperial College London, January 29th 2016
The CICH@Imperial: Facilitating research partnerships and educational activities for global child health

Professor Beate Kampmann
In 2015, 7.6 million children died just today: 21,000
just this minute: 14
“Boss,

This picture is from my friend.

It is a picture of the Years,

from me”
example:
this is a heap
this is a system.

Systems thinking

Aims of the Centre:

• **Combining Resources:** To join up existing international child health research activities within the College

• **Maximising Impact:** To maximise the visibility and impact of the excellent international child health work within Imperial College and beyond at national and international level

• **Training People:** To host and mentor paediatric research clinicians, paediatric academics and allied health professionals who are developing a career in international child health within Imperial and at partner organisations associated with the CICH
The Centre for International Child Health conducts, hosts and facilitates research with a focus on international child health.

We aim to be the unifying voice for Global Child Health within the international activities under the IGHI umbrella.
a hub for activities and partners in multi-disciplinary research
• facilitate the interactions of cross-faculty research groups at Imperial College

Centre for Health Policy

Wellcome Trust Centre for Global Health Research

Centre for Digestive & Gut Health

Centre for African research & engagement

Centre for International Child Health

Helix Centre for Design & Healthcare

The Hamlyn Centre for Robotic Surgery
• multi-disciplinary child health research incorporating lab, field and policy
• a platform of educational resources and connections for clinician-scientists and allied professionals

- scientists
- Post docs
- PhD students
- Medical students
- media
- politicians
- teachers
- Nurses & midwives
- Paediatricians
• access to world leading expertise in child health
IGHI/Imperial/collaborators

• partnerships with international researchers and sites

Prof Joy Lawn

Free Online Course - start date: 29 February 2016
This six-week free online course presents the latest data, priorities and debates about the health of adolescents, mothers, newborns and children worldwide.

Dr Stanley Zlotkin
Prof Zulfiqar Bhutta

http://www.sickkids.ca/globalchildhealth/

Coalition of Global Child Health Centres

Prof Trevor Duke
For the launch today:

Let’s go local before we go global

We cannot change the health of children with good will alone

but

without good will nothing will change
