

**MEng Design Engineering**

This document provides a definitive record of the main features of the programme and the learning outcomes that a typical student may reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities provided. This programme specification is intended as a reference point for prospective students, current students, external examiners and academic and support staff involved in delivering the programme and enabling student development and achievement.

<b>Programme Information</b>				
Award(s)	MEng			
Programme Title	Design Engineering			
Programme code	28G3			
Awarding Institution	Imperial College London			
Teaching Institution	Imperial College London			
Faculty	Faculty of Engineering			
Department	Dyson School of Design Engineering			
Associateship	City and Guilds of London Institute (ACGI)			
Mode and Period of Study	4 academic years full-time			
Cohort Entry Points	Annually in October			
Relevant <a href="#">QAA Benchmark Statement(s)</a> and/or other external reference points	<a href="#">Honours Degrees in Engineering</a> and <a href="#">Master's Degrees in Engineering</a>			
Total Credits	ECTS:	270 - 274	CATS:	540 - 548
<a href="#">FHEQ Level</a>	Level 7			
<a href="#">EHEA Level</a>	2 <sup>nd</sup> cycle			
External Accreditor(s)	<a href="#">Institution of Engineering Designers</a> (IED) <a href="#">Institution of Mechanical Engineers</a> (IMechE) <a href="#">Institution of Engineering and Technology</a> (IET)			
<b>Specification Details</b>				
Student cohorts covered by specification	2017/18 onwards (all years of study) 2016/17 entry cohort (years of study 2, 3 and 4) 2015/16 entry cohort (years of study 3 and 4)			
Person responsible for the specification	Sam McKenney (Operations Manager)			
Date of introduction of programme	October 2015			

Date of programme specification/revision	December 2016
<b>Description of Programme Contents</b>	
<p>The School of Design Engineering aims to deliver a course that prepares the next generations of engineering entrepreneurs and designers. The programme will provide students with a solid foundation in a wide-range of traditional engineering disciplines and, by combining this with modules in business, design, and a range of project- and industrially-oriented modules, including a 6 month on-site placement within industry, will produce engineers who are able to solve problems creatively and take products from the first stages of design right through to the market. To this end, the course has a particularly strong focus on the communication and translation of engineering.</p> <p>The degree programme contains a balance of theoretical and practical modules. Modules of the same credit volume often have a considerable variation in the ratio between scheduled learning and teaching activities, and independent study. This change in ratio is dependent on the subject matter (and learning objectives) of the module.</p> <p>Certain modules require more contact time to achieve the learning objectives, particularly in the form of lab and other practical activities. Where modules require more teaching and learning time, students are required to undertake less independent study. For other modules students are required to work more independently, either individually or with a group of other students on the programme group, therefore less learning and teaching hours are scheduled.</p>	
<b>Learning Outcomes</b>	
<p><b>Knowledge and Understanding of:</b></p> <ul style="list-style-type: none"> <li>• Scientific principles and methodologies which underpin relevant engineering disciplines, and enable appreciation of their scientific and engineering contexts.</li> <li>• Understanding of future developments and technologies.</li> <li>• The role and limitations of ICT, and an awareness of developing technologies in ICT for design, simulation, and control purposes.</li> <li>• Design processes and methodologies and the ability to apply and adapt them in unfamiliar situations.</li> <li>• The commercial and economic context of engineering processes.</li> <li>• Interpersonal-, business-, and project-management techniques and their appropriate application within design and engineering contexts.</li> <li>• Materials properties and selection procedures.</li> </ul> <p><b>Intellectual Skills:</b></p> <ul style="list-style-type: none"> <li>• Demonstrate the skills necessary to plan, conduct, and report a project of direct and immediate industrial relevance.</li> <li>• Integrate theory and practice to solve engineering, design and business problems.</li> <li>• Develop creativity in commercial and design contexts.</li> </ul> <p><b>Practical Skills:</b></p> <ul style="list-style-type: none"> <li>• Use laboratory methods to generate data.</li> <li>• Prepare technical reports.</li> <li>• Give technical presentations.</li> <li>• Make use of knowledge from a number of diverse areas to synthesise a feasible solution to a complex problem of design.</li> </ul>	

<b>Professional Skills Development:</b>	
<ul style="list-style-type: none"> <li>• Communicate effectively through oral presentations and written reports.</li> <li>• Use information and communications technology.</li> <li>• Develop management skills: group coordination, decision processes, objective criteria, problem definition, project design and evaluation needs.</li> <li>• Work as a team and/or independently as appropriate.</li> </ul>	
<b>Entry Requirements</b>	
Academic Requirement	A*AA overall, to include A or A* in Mathematics
Non-academic Requirements	None
Home/EU/international students will be invited to attend an interview.	
English Language Requirement	IELTS 6.5 with a minimum of 6.0 in each element or equivalent
The programme's competency standards document can be found at: <a href="http://www.imperial.ac.uk/engineering/departments/design-engineering/study/meng/">http://www.imperial.ac.uk/engineering/departments/design-engineering/study/meng/</a>	
<b>Learning &amp; Teaching Strategy</b>	
Scheduled Learning & Teaching Methods	<ul style="list-style-type: none"> <li>• Lectures</li> <li>• Tutorials</li> <li>• Workshops</li> </ul>
E-learning & Blended Learning Methods	<ul style="list-style-type: none"> <li>• On-line lecture materials via Blackboard</li> </ul>
Project and Placement Learning Methods	<ul style="list-style-type: none"> <li>• Group project</li> <li>• Individual project</li> <li>• Industrial placement</li> </ul>
<b>Assessment Strategy</b>	
Assessment Methods	<p>The following assessment methods will be used in the programme (as stated in the module descriptors):</p> <ul style="list-style-type: none"> <li>• Individual project work</li> <li>• Group project work and group reports</li> <li>• Lab practicals</li> <li>• Critiques. The consensual assessment technique (CAT) will be used for the assessment of individual and group project work where a substantial element of subjectivity is implicit.</li> <li>• Individual written reports</li> <li>• Oral presentations to staff and peers</li> <li>• Written Examinations</li> <li>• Vivas (where appropriate for borderline candidates)</li> </ul>

## Academic Feedback Policy

Critique will be used regularly throughout project work in order to provide peer and expert feedback. In particular the CAT process will be used for project gateways giving students effective feedback prior to finalisation of project work.

Voting applications for smartphones ('clickers') will be used to conduct informal test questions where appropriate within lecture series to enable lecturers to assess and adjust the lectures to account for areas of difficulty. This will be organised in consultation with the Learning Support team in the Faculty.

Coursework papers will be double-marked and comments by the markers will be annotated directly on the papers. A summary of the feedback (with tick boxes indicating relative attainment on key dimensions) will be completed, and an indicative grade will be given (actual marks will not be communicated to the students). These papers will then be returned to the students as soon as possible and within two weeks of submission.

Personal tutor meetings will also serve as part of the formative assessment process, as tutors will, where appropriate set questions for their tutees in order to monitor their progress and subjects where they may require further assistance.

The quality of the feedback provided to the students will be monitored by anonymous questionnaires set up on Blackboard.

## Re-sit Policy

The College's Policy on Re-sits is available at: [www.imperial.ac.uk/registry/exams/resit](http://www.imperial.ac.uk/registry/exams/resit)

For students not in their final year; it is possible, but not guaranteed, that a candidate who fails a Part can re-sit all the assessments in the following session. In the case of a marginal fail (i.e. with a grade in the range 30-39%) in one, or exceptionally two, modules, the examiners may set a **Supplementary Qualifying Test (SQT)** to allow the candidate to reach the pass mark and progress to the next part without delay. This course of action is not guaranteed and is only available where the performance in other assessments is very good.

### About SQT (Supplementary Qualifying Test)

SQTs are carried out before the start of the next academic year (end of August/beginning of September).

SQTs can take the form of examination or coursework. The decision on the exact form of the SQT will be taken by the module leader and will be designed to ensure that the module learning outcomes are achieved.

SQTs are capped at 40% in cases where a student has failed the module during the year. If a student subsequently fails the SQT, he/she will fail the year. An extraordinary Board of Examiners meeting will need to take place, where it will be decided whether the student will be offered an opportunity to retake the year.

Students may also be permitted to progress to the next academic year if they marginally fail one SQT

with a grade in the range 30-39%, and where their overall aggregate mark for the year is 45% or higher. An extraordinary Board of Examiners meeting will need to take place to determine whether the student will be permitted to bring forward the fail grade. This can ONLY be permitted after the SQT (not before).

If a student is taking an SQT following the approval of mitigating circumstances, the 40% cap will not apply. If a student with approved mitigating circumstances subsequently fails the SQT at the first attempt, an extraordinary Board of Examiners meeting will need to take place, where it will be determined whether the student will be permitted to take an additional SQT which will be capped at 40%. If the student subsequently fails this second SQT, he/she will fail the year, and an extraordinary Board of Examiners meeting will need to take place to determine whether the student will be offered an opportunity to retake the year.

Failing to attend an SQT without approved mitigating circumstances will result in a 0% grade, therefore a fail of the year.

#### Mitigating Circumstances Policy

The College's Policy on Mitigating Circumstances is available at: [www.imperial.ac.uk/registry/exams](http://www.imperial.ac.uk/registry/exams)

#### Assessment Structure

##### Marking Scheme

##### Year One

A student must:

- Achieve a mark of at least 40% in each module

##### Year Two

A student must:

- Achieve a mark of at least 40% in each module

##### Year Three

A student must:

- Achieve a mark of at least 40% in each module

##### Year Four

A student must:

- Achieve a mark of at least 40% in each module

#### Final Degree Classifications

Third – a student must achieve an aggregate mark of 40%

Lower Second – a student must achieve an aggregate mark of 50%

Upper Second – a student must achieve an aggregate mark of 60%

First - a student must achieve an aggregate mark of 70%

Year	% Year Weighting	Module	% Module Weighting
Year One	11.1%	Engineering Mathematics	12.5%
		Communication in Design	16.67%
		Production and Materials	16.67%

The College's Academic and Examination Regulations can be found at: <http://www3.imperial.ac.uk/registry/proceduresandregulations/regulations>

Imperial College is an independent corporation whose legal status derives from a Royal Charter granted under Letters Patent in 1907. In 2007 a Supplemental Charter and Statutes was granted by HM Queen Elizabeth II. This Supplemental Charter, which came into force on the date of the College's Centenary, 8th July 2007, established the College as a University with the name and style of "The Imperial College of Science, Technology and Medicine".
