Tissue user progress report

Dear Researcher,

We would be most grateful if you would provide a short report summarising the work that you have performed on samples of tissue supplied by the Tissue Bank. This is one of the conditions that you agreed to in accepting the human tissue (please refer to Terms and Conditions in the tissue request form). Also, inform us if the work has been published and if so, please supply electronic copies (PDF files) of full papers and meeting abstracts.

We would also appreciate if you could provide some feedback using the questionnaire on page 4 and suggest ways in which the Tissue Bank could improve the service that it offers to scientists. Further, please let us know whether the project is ongoing and what your future tissue requirements are likely to be.

Should you require any further information regarding the submission of your report please contact Dr Djordje Gveric on 020 7594 7204 or e-mail d.gveric@imperial.ac.uk.

The completed form should be saved under your name and together with electronic copies of publications e-mailed back to us (brainbank@imperial.ac.uk).

Many thanks,
Tissue Bank Team

Project details

Name: E-mail: Date:

Address:

Project title:

Project category

Multiple sclerosis
Parkinson's disease
Other

Tissue used

Snap-frozen
Fixed-frozen
Formalin-fixed/paraffin-embedded

Current status of the study

Finished
Ongoing
