

CASC-IC

CASC started in July 2008 with EPSRC funding (£5.5M) for a five-year programme. The EPSRC funding has come to an end in June 2013, but CASC continues to prosper. The CASC has attained a large number of active industrial collaborations from abroad and in the UK. An Industrial Consortium (IC) has been set up now with leading ceramics industries.

INDUSTRIAL CONSORTIUM (IC)

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

A key part of CASC's sustainability is the development of a consortium of companies with interest in manufacture or use of structural ceramics. To build on CASC's early success and to build long-term and fruitful relationships between CASC-associated academics and the UK's industrial structural ceramics community we have set up an industry consortium scheme.

The Industrial Consortium develops the CASC Business Plan which contains the Centre vision, objectives and an action plan to deliver the vision.

It acts in an advisory role to the Director and to the Local Management Team, in particular providing advice on:

- a) The strategic research focus of the centre
- b) The infrastructure, skills needs and links to industry and other research groups worldwide
- c) The structure and content of any undergraduate and postgraduate courses provided by the centre

DIAMOND MEMBERSHIP

Diamond membership is aimed at large and multinational companies, who would like strategic advice and board-level interaction with senior academic staff at CASC. The relationship, which might include technical briefings and RAEng Industrial Fellowships, would be tailored to individual company requirements.
