Further particulars
The Provost’s Visiting Professor (PVP) programme
An introduction to the post

Imperial College London is one of the world’s leading institutions for research and teaching in the natural and physical sciences, medicine, engineering, and business.

We are looking for outstanding and enthusiastic researchers and educators to join the College as visiting academics by appointment through the Provost’s Visiting Professor Programme (PVP).

The Programme has been established to broaden the College’s reach by developing new relationships with exceptional individuals and their organisations around the world.

Creating a diverse community of staff and students is one of the cornerstones of Imperial’s Equality, Diversity and Inclusion Strategy. Therefore, we wish to attract greater numbers of outstanding students, academics and staff with diverse backgrounds and characteristics to the College.

The College is committed to improving gender and racial equality. It has developed a plan to do this as part of its participation in the Athena Swan and Race Equality Charters.

The action plans associated with these Charters aim to improve the representation, progression and success of women and minority ethnic staff and students within higher education.

The PVP Programme is one component of the broader plan that is designed to facilitate engagement and development at pre-College, undergraduate, graduate, postdoctoral and faculty levels, increasing the number of academics from under-represented groups.

Therefore, we are specifically looking for candidates from underrepresented groups such as Black and other minority ethnic backgrounds, and female scholars.

Applications are invited for the visiting professorships from scholars with international reputations in their fields.

The annual programme will host up to four new visitors per year with appointments lasting between 6 and 12 months.

Appointees will be paid at the appropriate College academic scale, along with a contribution towards travel costs.
This is a superb opportunity for academics interested in spending a sabbatical leave from their current institution at Imperial, and who would be willing to participate in this high-level, pivotal initiative programme.

The Visiting Professors will participate in the College by appointment in a host department, on the basis of both of their proposed research programme and their plans for engagement with the wider College community, through for example, lectures and seminars in academic courses, well-publicised general-audience or public lectures, conducting workshops and meeting with students and staff across the campuses.

In the 2022–23 intake, we appointed senior leaders in their fields as Provost’s Visiting Professors. These include researchers from the University of Nairobi, Kenya; from the Manipal Academy of Higher Education and The George Institute for Global Health in India; from the Muhimbili University of Health and Allied Sciences (MUHAS) in Tanzania; and from the University of Bologna in Italy.

Two other senior leaders are visiting Imperial for academic collaborations as part of the aim of the PVP Programme: one from the University of KwaZulu-Natal in South Africa and the other from the National Space Research and Development Agency (NASRDA), Nigeria.
Introducing Imperial College London

Imperial College London’s mission is to achieve enduring excellence in research and education in science, engineering, medicine, and business for the benefit of society.

Imperial is one of the world’s greatest universities, renowned for its ground-breaking research, talented community of staff, students and alumni and its international reach.

With a mission to achieve enduring excellence in research and education in science, engineering, medicine and business for the benefit of society, the College was founded in 1907 in South Kensington, bringing together nineteenth-century institutions including the Royal College of Science, the Royal School of Mines and City and Guilds College.

Today, Imperial collaborates extensively with neighbouring institutions, including the Royal College of Art and the Royal College of Music. From its location in this great cultural quarter, Imperial provides one of the world’s best educations in STEM subjects for more than 20,000 students, over half of whom come from overseas, reflecting its status as the UK’s most international university. Its alumni and members also include 14 Nobel laureates and three Fields Medallists.

Throughout its history, the College has been involved in many major breakthroughs, including the discovery of penicillin and the creation of the hologram. This tradition has continued with recent innovations such as wirelessly transferring power to drones in flight, the discovery of a new form of light and major new research in climate change, amongst much else.

Imperial has four academic faculties – Engineering, Medicine, Natural Sciences and the Imperial College Business School – as well as a significant number of interdisciplinary research centres focusing on challenging world problems.
The College’s mission is supported by 8,500 highly diverse staff, who collaborate widely in the UK and internationally, often across disciplines. In 2020–21 the College had a total turnover of £1.079 billion, of which £363 million directly supported research through grants and contracts.

You can read our most recent Annual Report and Accounts on our website.

Imperial has a leadership model comprising the President, Professor Hugh Brady, and the Provost, Professor Ian Walmsley FRS.

Our strategy and achievements

The College’s 2020–2025 Strategy is built on underpinning foundations that make Imperial a great academic institution and the talented, diverse and inspirational people who help make up our university community.

The College’s success is recognised all over the world and is evidenced by daily coverage of Imperial discoveries and innovations in the international media.

This follows a series of achievements for the College over the past year, including its best-ever results in the UK’s Research Excellence Framework (REF) and a Queen’s Anniversary Prize in recognition of pioneering work during the COVID-19 pandemic.

Imperial was named by the Guardian University Guide as the University of the Year 2023. This achievement follows Imperial’s ranking as University of the Year 2022 and University of the Year for Student Experience 2022 by the by the Times and Sunday Times Good University Guide, and overall student satisfaction reported at 82% in the National Student Survey 2022.

You can learn more about these achievements on our website.

Our values

Imperial is committed to equality of opportunity and to eliminating discrimination.

We have recently refreshed our values and launched a new Imperial Values and Behaviours Framework.

Our values are:
• Respect
• Integrity
• Collaboration
• Innovation
• Excellence

You can learn more about our Values and Behaviours on our website.

Sustainability

Sustainability is a major focus for Imperial and one of the most pressing challenges of our time. We are dedicated to innovation, research and working together to deliver a net zero carbon and climate resilient future.

After the government committed to a target of 2050 for net zero carbon emissions, we established a Sustainability Advisory Group and launched our own Sustainability Strategy in December 2020.

The Sustainability Strategy sets out our long-term goal to be a sustainable, net zero carbon institution by 2040.
Equality, diversity and inclusion

As a leading university in the heart of London, Imperial proudly upholds a longstanding commitment to equality, diversity and inclusion. Valuing the diversity of our community is one of the four cornerstones of our strategy and we are striving to further inclusion and equality through numerous formal and informal practices across our institution.

Our aim is to embed equality, diversity, and inclusion into all our work at Imperial. We take pride in our declared mission “to achieve enduring excellence in research and education in science, engineering, medicine, and business for the benefit of society”. This reflects our civic role as a repository for knowledge and culture, as an institution that fosters independent and critical reflection, and as an agent of positive societal change. We are defined by our community of staff and students.

We know will only succeed in our mission by cultivating an environment that respects, supports, and celebrates all the people who come to Imperial, enabling them to enrich the world and their own lives through work and study.

To ask the right questions and come up with the most useful answers we need to harness the best minds across the broadest perspectives. We believe that excellence comes in many forms. If Imperial is to thrive in a world that has never been more diverse and interdependent, and to play its full part in advancing social progress and mobility through research, teaching, clinical practice, entrepreneurship, outreach, and public engagement, we must become more cognisant of the benefits that will flow from moving equality, diversity, and inclusion to the heart of our institution.

You can find out more about Imperial’s EDI ambitions on our website.
Education

At Imperial we deliver a world-class educational experience.

Imperial offers all its students a world-leading, rigorous, evidence-based, inclusive educational experience embedded in a vibrant research environment.

The Learning and Teaching Strategy supports evidence-based innovation in education across the College, drawing on the great work that is already taking place.

We are committed to ensuring that an Imperial education is:

- Recognised as globally outstanding in the fields of science, engineering, medicine, and business, with a focus on the skills needed to address current and future global challenges.
- Acknowledged as leading in technology-enhanced and innovative practice.
- Known for combining evidence-based pedagogy with a strong focus on community building, with students acting as partners in shaping their experience.
- Renowned for applying the rigour of research to the evaluation and enhancement of practice.
- Sought out by the world’s leading educators as a source of inspiration, aspiration, and collaboration.

Our Learning and Teaching Strategy sets out our ambition to deliver a world-class educational experience which is research based, student-centred, evidence-based, inclusive and diverse, outward-looking, and technology-enhanced.
Our aim for our graduates is that they will:

- demonstrate deep conceptual understanding of their chosen discipline;
- work effectively in multi-cultural, international teams and across disciplinary boundaries;
- approach challenges with curiosity, critical thinking, and creativity;
- innovatively apply their skills to tackling complex real world problems;
- understand and value different cultures and perspectives;
- develop into independent learners with high self-efficacy;
- display a strong sense of personal and professional identity.

As a leader in science and innovation, with a talented and diverse community of teachers, Imperial strives to offer a rigorous and inclusive learning experience within one of the world’s most vibrant research environments.

We have embarked on an institution-wide transformation of our teaching, based on evidence that innovative teaching techniques enable more effective learning, increase students’ sense of personal and professional identity, and create a stronger sense of community.

Our extensive track record of innovative teaching demonstrates the breadth of experience across the College teaching community and is a key resource for our teachers to draw upon in future.
Research

Imperial is a top global university thanks to its cutting-edge and influential research. Students come here to learn from, and work with, some of the best researchers currently working in their fields.

Research excellence

When it comes to research, at Imperial we share ideas, expertise and technology to find answers to the big scientific questions and tackle global challenges. We have a total research budget of £475 million and our aim is to have research widens the boundaries of knowledge and benefits wider society.

Our recent results in REF 2021 reaffirm that Imperial is the best place in the UK for academics to pursue their research – with Imperial ranking first in the UK for research outputs, research environment and first for research impact within the Russell Group.

Our research is also defined by its internationalism, innovation and impact. Two-thirds of it involves an international collaborator, spanning more than 130 countries, making us the UK’s most international university.

And our talented staff don’t just cross borders; they transcend traditional academic disciplines to tackle major societal priorities. Challenges like climate change, future energy supplies, antibiotic resistance and national security can only be tackled by bringing together highly collaborative, multidisciplinary teams. Such partnerships require patience and curiosity and thrive in environments in which the facilities and research ethos are outstanding.

Over the past year, Imperial has brought its world-leading expertise to the frontline of the COVID-19 pandemic. Our MRC Centre for Global Infectious Disease Analysis is publishing regular reports on the development and potential health impacts of the virus. You can read their latest reports on the centre’s website.

There are many strands to a world-class research university. Imperial undertakes fundamental, discovery-led, as well as aspiration driven, research. We deliver impact through encouraging technology transfer, policy interventions, startups and industry partnerships. A commitment to excellence in all of these underpins everything we do.

You can learn more about the impact of our research in our REF case studies.
Our locations

Imperial’s main campuses are located in South Kensington and White City. The College has six other locations in London based at Charing Cross, Chelsea and Westminster, Hammersmith, Northwick Park, the Royal Brompton, and St Mary’s hospitals.

The College’s Silwood Park Campus near Ascot focuses on ecology, evolution, and conservation.

The White City Campus is Imperial’s 20-acre development in West London, a planned £2 billion investment that brings together world-class researchers, businesses, and partners from academia to work, share ideas, and turn cutting-edge research into benefits for society.

The campus is located in the heart of White City, one of London’s most exciting, dynamic, and rapidly changing neighbourhoods, close to the Hammersmith Hospital and the MRC London Institute of Medical Sciences. The area is home to pioneers in arts, culture, innovation, science, and learning – organisations like BBC Media Village and the Royal College of Art, as well as a growing number of life sciences and tech businesses.

We are committed to making a positive impact, working with the local community to create new opportunities, develop talent, and make tangible improvements in areas like education, employment, enterprise and health.

Two cornerstones of this effort are The Invention Rooms and the new School of Public Health, both exciting and important ways for us to work with our local communities.

The recently opened Sir Michael Uren Hub, also at White City, co-locates engineers, scientists, and doctors, in order to help solve complex medical challenges. Made possible through a generous donation of £40 million from Sir Michael Uren, an Imperial alumnus, it opened in 2019.

At Imperial, we have a global footprint too. The College established a new medical school, the Lee Kong Chian School of Medicine, in partnership with Nanyang Technological University in Singapore, and admitted its first students in 2013. We also have many highly successful academic collaborations with institutions around the world, ranging from digital diagnostics for Malaria with partners across West Africa, to zero pollution technology research with the Massachusetts Institute of Technology (MIT) in Boston and AI, healthcare and robotics applications with the Technical University of Munich (TUM).

Key specific responsibilities/duties

We are seeking individuals with an international reputation and expertise in their field of research with a sustained track record in research (for example publications presentation, patents and grants) and who have made distinctive and impactful contributions to their field. It is expected that individuals applying from another academic institution be of Professor, Associate Professor/Reader status.

Due to the nature of the PVP Programme, applicants will need to demonstrate evidence of contribution to the development and performance of colleagues through coaching and mentoring. Additionally, the post-holder must have the experience and capability to act as a role model in areas of research, teaching and management as appropriate, and an understanding of the UK context.

We expect the post-holder to participate fully in College life, and support is objectives in equality, diversity, and inclusion. The PVP Professors will be visible to the community through lectures and seminars, and will actively engage students and staff across the College.
The key responsibilities are:

- Conduct high quality research and teaching in the post-holder's field.
- Contribute to the development of excellent teaching, teaching methods and assessments in the department to enhance the quality of teaching.
- To reinforce the College's commitment to an open and rigorous academic community.
- To work across departments in their intellectual endeavours, and engaging all parts of the Imperial community, as well as the wider public.
- To facilitate engagement and development at pre-College, undergraduate, graduate, postdoctoral and faculty levels, with a view to increase the number of academics and students from underrepresented groups.
- To give lectures and seminars in academic courses, and public lectures, as appropriate.
- To conduct workshops and meeting with students and staff across the campuses.
- To make a significant contribution to building and establishing links between the appropriate departments and colleagues and between the College and the post-holder's previous institution.
- To help the College build networks that will support recruitment of scholars with a focus on increasing applications from all sections of the community, particularly from underrepresented groups such as our Black, minority ethnic and female scholars.
- Please note that job descriptions cannot be exhaustive, and the post-holder may be required to undertake other duties, which are broadly in line with the above key responsibilities.

Other key responsibilities and duties:

Additional responsibilities of the Provost's Visiting Professor (PVP) Programme may include further teaching and engagement with the wider College Community as agreed with the Provost and Head of Department.
Person Specification

Applicants will be assessed against the following person specifications, taking into account the level of the position for which they are applying:

E – Essential: Requirements without which the job could not be done.
D – Desirable: Requirements that would enable the candidate to perform the job well.

Our faculties

Imperial has four faculties: the Faculty of Engineering, the Faculty of Natural Sciences, the Faculty of Medicine and Imperial College Business School.

The Faculty of Engineering

The Faculty of Engineering is one of four faculties within Imperial College London and is led by the Dean, Professor Nigel Brandon OBE FREng FRS. The Faculty seeks to provide international leadership in engineering research and education and is widely recognised as a world-leading engineering school.

Our departments consistently excel in prominent league table rankings, while the College as a whole enjoys similar success. Our Faculty is unique in the UK in supporting world-class education and fundamental research across the full range of engineering disciplines.

All ten of our academic departments are located on a single campus in South Kensington, giving a concentration of talent that creates a stimulating and vibrant research culture which promotes multidisciplinary collaborations and attracts internationally leading researchers and scholars.

Our academic departments deliver world-class education in engineering in order that our graduates possess the skills, knowledge and attitudes necessary to become international leaders in engineering industry and academia.

We provide our students with an outstanding engineering education, which brings together cutting-edge researchers, exceptional teachers and state-of-the-art facilities in inspiring physical and virtual environments. Students at Imperial will meet, work and live with people studying every aspect of engineering.

The Faculty is home to 1,746 staff (421 academics, 828 researchers and 496 support staff) and 7,929 students (of whom around 1,700 are research students). The Faculty is a powerhouse in research across the engineering sciences, with research funding in excess of £100 million per year.

The Faculty of Engineering is based at the South Kensington and White City campuses and comprises eleven departments covering all aspects of Engineering:

- Aeronautics
- Bioengineering
- Chemical Engineering
- Civil and Environmental Engineering
- Computing
- Dyson School of Design Engineering
- Earth Science and Engineering
- Electrical and Electronic Engineering
- Materials
- Mechanical Engineering
The Faculty of Medicine

The Faculty of Medicine is led by the Dean, Professor Jonathan Weber. The Faculty was established in 1997, bringing together major West London medical schools into one world-class institution. It maintains close links with a number of NHS Trusts with whom it collaborates in teaching and research activities.

The Faculty is spread across several West London campuses, including South Kensington and the following hospital sites: Charing Cross, Chelsea and Westminster, Hammersmith, Northwick Park, Royal Brompton and St Mary’s.

The White City Campus (where the Faculty will also have a significant presence) is Imperial’s major new campus in West London, bringing together world-class researchers, businesses and partners from academia to work, share ideas and turn cutting-edge research into benefits for society.

Although on several sites, its academic departments function as one Faculty, fully integrated within the College.

The Faculty of Medicine launched a new departmental structure from the start of the academic year 2019–20. This new structure was created by the Dean as part of the strategic vision for Medicine. The new structure was designed to enable development in key areas of our science, widen academic engagement and drive forward on the opportunities which exist across Imperial for health-related science and translational collaboration.

The Faculty also hosts the cross-Faculty Institute of Global Health Innovation which is led by Professor the Lord Ara Darzi of Denham and Professor David Nabarro.
The Faculty of Natural Sciences

The Faculty of Natural Sciences enjoys an outstanding reputation for high-quality research and education.

Employing over 1,200 staff, with approximately 4,600 students and with a research income in excess of £70 million, it is home to the departments of Chemistry, Mathematics, Physics, Life Sciences, as well as the Centre for Environmental Policy and the Grantham Institute – Climate Change and the Environment.

The College offers significant opportunities for cross-disciplinary collaborations and, in pursuing a truly multidisciplinary approach, the Faculty addresses some of the world’s most challenging problems.

Research and education take place in a diverse and stimulating academic environment, located across three College campuses: South Kensington (central London), White City (west London) and Silwood Park (near Ascot in Berkshire).

The Faculty is led by the Dean, Professor Richard Craster, and is committed to continuing to attract and develop the highest quality students and staff for its successful undergraduate and postgraduate courses.

The Faculty’s academics are highly regarded for their commitment to research-led learning and teaching and the volume and quality of their research.

Cross-College interdisciplinary and inter-Faculty activities flourish, and enormous mutual benefit is gained from national and international alliances and collaborations with industry and with other institutions and organisations.
Imperial College Business School

Imperial College Business School is part of the Imperial College London structure and it is led by the Dean, Professor Francisco Veloso. It has over 75 academic staff, 20 research staff, and 190 professional support staff. It educates more than 1,400 students in a variety of undergraduate, MBA, MSc and PhD programmes and has a considerable non-degree Executive Education programme portfolio.

The school was ranked in the top three Business Schools by the UK government’s recent Research Excellence Framework (REF). It is amongst just one per cent of business schools worldwide to have been accredited by the three largest, and most influential, business school accreditation associations: AASCB, AMBA and European Quality Improvement System.

It is also one of the first business schools to receive a department level Bronze Athena Swan award from the Equality Challenge Unit (ECU), in recognition of its commitment to tackling gender inequality in higher education.

Imperial College Business School has grown substantially in recent years, with major investment by Imperial College. The Business School has six core academic areas as follows:

- Analytics & Operations Management
- Economics & Public Policy
- Finance
- Innovation & Entrepreneurship
- Marketing
- Strategy & Organisational Behaviour
Further information about the post

Appraisal and Performance Review Systems

The purpose of the appraisal and performance review systems is to review performance and development needs. Staff are required to participate in these schemes when requested to do so by the Provost and Personal Review and Development Plans are conducted on an annual basis.

Office and Administrative Facilities

The post-holder will have office facilities, including computer with internet access, and access to administrative support at the South Kensington and White City campuses.

Imperial Values

Imperial College is committed to equality of opportunity and to eliminating discrimination. All employees are expected to follow Imperial Values and Behaviours framework.

Our values are:

- Respect
- Collaboration
- Excellence
- Integrity
- Innovation

Employees are also required to comply with all College policies and regulations paying special attention to:

- Confidentiality
- Conflict of Interest
- Data Protection
- Equal Opportunities
- Financial Regulations
- Health and Safety
- Information Technology
- Smoking
- Private Engagements and Register of Interests

All employees are expected to adhere to the principles set out in its Equal Opportunities in Employment Policy, Promoting Race Equality Policy and all other relevant guidance/practice frameworks. They must also undertake specific training and assume responsibility for safety relevant to specific roles, as set out on the College Website Health and Safety Structure and Responsibilities page.

The College is a proud signatory to the San Francisco Declaration on Research Assessment (DORA), which means that in hiring and promotion decisions, we evaluate applicants on the quality of their work, not the journal impact factor where it is published. For more information, see www.imperial.ac.uk/research-and-innovation/about-imperial-research/research-evaluation.

The College believes that the use of animals in research is vital to improve human and animal health and welfare. Animals may only be used in research programmes where their use is shown to be necessary for developing new treatments and making medical advances. Imperial is committed to ensuring that, in cases where this research is deemed essential, all animals in the College’s care are treated with full respect, and that all staff involved with this work show due consideration at every level:

You can learn more about animal research at Imperial on our website.

We are committed to equality of opportunity, to eliminating discrimination and to creating an inclusive working environment for all. We therefore encourage candidates to apply irrespective of age, disability, marriage or civil partnership status, pregnancy or maternity, race, religion and belief, gender identity, sex, or sexual orientation.

We are an Athena Swan Silver Award winner, a Disability Confident Leader and a Stonewall Diversity Champion.
Salary and Conditions of Service, including Benefits

A full set of terms and conditions will be given to the successful candidate, together with the College’s most important policies, which affect staff. The principal terms and conditions are as follow:

The post will be commensurate at the Professor level of the Academic Job Family.

Contribution towards travel costs may be provided to the postholders.

Any salary increases or performance payments will be determined in accordance with procedures which govern senior academic staff.

Annual cost of living increases will be determined by Imperial College through its local collective bargaining machinery.

Salaries are payable on the 24th day of each month (the exception being December) by transfer to a bank or building society account. Deductions in respect of income tax and National Insurance contributions will be made from salaries at the statutory rates.

Academic staff normally take annual leave during College vacations and by arrangement with the Head of Department in the light of academic and departmental requirements.

Annual leave entitlement is 39 days for full time staff (pro rata entitlement for part time staff). This is inclusive of 8 days for Public holidays and a total of six days each year when the College is closed over Easter and Christmas.

In some years, because of the day of the week on which Christmas day falls, a decision may be made to increase the College closure to seven days. In these circumstances the annual leave entitlement will be increased to 40 days for full- time staff (again pro-rata for part-time staff).

At the beginning of the leave year staff will be required to allocate the appropriate number of days of their mandatory leave entitlement to cover the College Closure days and Public holidays that fall within that leave year. For part-time staff the allocation should cover their normal working days that fall upon a College closure day, bank or public holiday during that leave year.

The occupational pension scheme is the Universities Superannuation Scheme (USS). Staff members who are already members of the Federated Superannuation System for Universities (FSSU) or the National Health Service Superannuation Scheme (NHSPS) may, if they are still eligible, retain their membership in these schemes.

Unless stated otherwise in the offer of employment, or agreed by the head of department, the appointment may be terminated by either side by giving a minimum of three months’ notice in writing. For academic members of staff who wish to give notice of their intention to resign from the College the last day of service should fall on one of the following dates: 31 December; 31 March; 30 June or 30 September or at the end of a term by agreement with the Head of Department.

All staff have a probationary period of six months, with the exception of Assistant Professors, Non-Clinical Lecturers and Senior Lecturers (Clinical and Non-Clinical) who normally serve three years. Clinical Lecturers normally serve one year.

Staff on a fixed term contract receive notice of the ending of their employment within that contract. No further contractual notice will be given unless the contract is to terminate prior to the end date specified in the offer of employment. In these circumstances the notice from the College would be as above.
Total Remuneration Package

Our Total Remuneration Package (TRP) for staff is a key component of realising the College’s strategic aim. The TRP is the overall package of pay, recognition, pensions and other benefits by which we compensate staff for their contributions to Imperial’s mission.

The College supports many initiatives to support staff in their personal life (flexible working, private health insurance, staff networks, support for staff, childcare and carers). Benefits to support an active lifestyle and health initiatives, such as free health checks for over 50s and cycle to work scheme, whereby you apply for an interest free loan for the purchase of a bicycle to encourage cycling to work for fitness.

Childcare

Our staff have access to the Early Years Education Centre (EYEC) which is the College’s ‘Outstanding’ Ofsted rated nursery, located at the South Kensington Campus. We also have other affiliated nurseries located at other campuses. All staff working directly with children have specialist training, and children benefit from continuity of care.

Imperial offers support with EYEC fees in the form of a salary sacrifice scheme enabling parents to pay fees before tax and national insurance contributions are taken. A reduced fee rate is available for students.
How to apply

Our preferred method of application is online, on our Imperial Jobs website.

Please apply online following the instructions on the application form.

Applicants should contact three referees before applying to ensure their willingness, if requested by Imperial College, to provide a reference for your application.

Application closing date

Applications for this role close on Monday 9 January 2023.

Questions about this role?

To discuss the post informally, please contact provost@imperial.ac.uk

For queries on the application process, contact Maria Monteiro, Senior Appointments Manager.
