

IMPERIAL

Department of Chemical Engineering

**World-leading department for
research and student experience
in chemical engineering**

Study at Imperial

Undergraduate courses

MEng Chemical Engineering

MEng Chemical Engineering with a year abroad

Postgraduate courses

MSc in Advanced Chemical Engineering

MSc in Advanced Chemical Engineering with Biotechnology

MSc in Machine Learning and Process Systems Engineering

PhD in Chemical Engineering

Our mission is to deliver world-leading research, education, enterprise, leadership and inspiration in chemical engineering, locally, nationally and globally.

RESEARCH THEMES

Biomedical engineering and industrial biotechnology

Engineering biological and biomedical systems to improve human health, and the world around us

Energy and environmental engineering

Delivering materials, methods, processes and technologies in support of a sustainable future

Materials

Making materials matter: understanding the behaviour of materials for optimising technological processes and product applications

Multiphase transport processes

Creating the next generation of multi-scale modelling tools and measurement techniques for complex multiphase flows

Multi-scale computational chemical engineering

Computational and systems approaches for the analysis, design and optimisation of chemical, physical and biological processes across length and time scales

Separations

Developing energy efficient separations across a range of industrial applications

Reaction engineering and applied catalysis

Developing novel, clean and efficient chemical processes while minimising negative impacts on the world and its resources

Multi-scale computational thermodynamics and molecular systems

Quantative prediction of the thermophysical properties and phase behaviour of matter to provide insight into its behaviour

Soft matter engineering

Designing, synthesising, assembling, characterising and modelling soft materials for applications ranging from healthcare to energy

ACADEMIC STAFF

Professor Claire Adjiman
Professor of Chemical Engineering

Professor João Cabral
Professor of Soft Matter

Dr Francesca Ceroni
Associate Professor in Cell Engineering

Professor Benoit Chachuat
Professor of Process Systems Engineering

Professor David Chadwick
Professor of Applied Catalysis

Dr Antonio Del Rio Chanona
Associate Professor

Professor Rongjun Chen
Professor of Biomaterials Engineering

Professor Yuval Elani
Associate Professor in Biochemical Technologies

Professor Salvador Eslava
Associate Professor in Applied Energy Materials

Professor Paul Fennell
Professor of Clean Energy

Professor Amparo Galindo
Professor of Physical Chemistry

Dr Andreas Güntner
Associate Professor in Chemical Engineering

Professor Jason Hallett
Head of Department, Chemical Engineering

Dr Ceri Hammond
Associate Professor in Chemical Engineering

Dr Anna Hankin
Associate Professor

Professor Adam Hawkes
Professor of Energy Systems

Professor Klaus Hellgardt
Professor of Chemical Engineering

Professor Jerry Heng
Professor in Particle Technology

Professor George Jackson
Professor of Chemical Physics

Professor Serafim Kalliadasis
Professor of Engineering Science & Applied Mathematics

Professor Sergei Kazarian
Professor of Physical Chemistry

Professor Cleo Kontoravdi
Professor of Biological Systems Engineering

Dr J Krishnan
Associate Professor in Biological and Chemical Information Processing Systems

Professor Kang Li
Professor of Chemical Engineering

Professor Sandro Macchietto

Professor of Process Systems
Engineering/Director of ChemEng
Enterprise

Professor Geoff Maitland

Professor of Energy Engineering

Professor Christos Markides

Professor of Clean Energy
Technologies

Dr Mehmet Mercangoz

ABB Associate Professor in
Autonomous Industrial Systems

Professor Erich Muller

Professor of Thermodynamics

**Professor Constantinos
Pantelides**

Professor of Chemical Engineering

Dr Maria Papathanasiou

Associate Professor in Process
Systems Engineering

Professor Camille Petit

Professor of Materials Engineering

Professor Ronny Pini

Professor of Multiphase Systems

Professor Karen Polizzi

Professor of Biotechnology

Dr Roberto Rinaldi

Associate Professor in Applied
Chemistry

Professor Nilay Shah

Professor of Process Systems
Engineering

Dr Pietro Sormanni

Associate Professor in Chemical
Engineering

Dr Chris Tighe

Associate Professor

Professor Magda Titirici

Professor of Sustainable Energy
Materials

Professor Martin Trusler

Professor of Thermophysics

Professor Daryl Williams

Professor of Particle Science

Professor Yun Xu

Professor, Biofluid Mechanics &
Director of Graduate School

Dr Ali Yetisen

Associate Professor

ChemEng Enterprise

Tackling global challenges
a spinout at a time

We have developed a thriving and successful Enterprise culture within the Department of Chemical Engineering.

Our mission is to help build access to the best resources, talent and expertise to support student and staff entrepreneurship, and we have a wonderful history of spinouts emanating from the department.

In the past two years alone, ChemEng Enterprise has launched a new website, a Spinout Workshop series, 6 deep-tech spinouts, and generated a pipeline of a dozen high quality spinouts at various stages.

25/26 highlights

ChemEng Enterprise

ChemEng Enterprise named finalist at IChemE Global Awards 2025.

Nanomox

Nanomox raises £2.4m to scale sustainable ionic liquid platform for advanced materials and critical minerals.

SOLVE Chemistry

London-based SOLVE Chemistry secures £4m to modernise chemical production.

Brilliant Dyes

From lab to global stage: Brilliant Dyes win global award.

DyeRecycle

STEM meets style: Imperial spinout showcased in leading fashion publication.

Orthogonal Peptides

New Imperial spinout developing breakthrough drugs for world diseases.

People of Enterprise

Meet some of our ChemEng Enterprise leaders

Professor Sandro Macchietto

Dr Apanpreet Kaur

Dr Aida Rafat

Md Tabish Noori, Redwan Rahman
