

Thanks to the Stevenson Fund scholarship I visited Professor Claire Voisin at the Institut de Mathématiques de Jussieu-Paris Rive Gauche. My time in Paris has been really lovely. Professor Voisin was always very kind and helpful and thanks to her my visit was a success. She introduced me to all the people in the department and invited me to go to the weekly algebraic geometry seminar where I met and discussed with a lot of important researchers in my field.

Thanks to Professor Voisin I met one of her collaborators, Dr. Simone Diverio, leading expert in complex geometry. I started a fruitful collaboration with Simone that will soon culminate in a joint paper. My visit to Paris has been an incredible boost for my research.

I was invited to give a talk at the École Normale Supérieure geometry seminar about my research project and an introductory talk about my research field to the PhD students of Jussieu. They both have been a great experience and a nice occasion to interact with the other people of the department.

I do not probably have to mention that Paris is also an amazing city to live in. I loved spending some months there and get to know the city a little bit better.
