White City Campus is Imperial College London’s major new campus in West London, bringing together world class researchers, businesses and partners to work, share ideas and turn cutting-edge research into benefits for society.

The Construction Update provides news and information about building works and upcoming construction activities on campus.

### Building Updates

#### North site

**Residential Tower**

Hard landscaping work around the base of the Residential Tower (illustrated on the map above) continues, while commissioning of apartments is progressing. Over the next month, contractors Laing O’Rourke will complete communal areas on the ground floor and in the basement. The Tower is expected to be completed in early 2019.

**Michael Uren Biomedical Engineering Research Hub**

Inside the building, drylining – a system for cladding the internal faces of buildings, such as walls and ceilings – is taking place in the basement and across Levels 1 to 7. Over the next month, contractors ISG will continue to install pipework and sprinkler systems in the basement, ground floor and across Levels 1 to 5. The building is on track for completion in late 2019.
**BUILDING UPDATES**

**South site**

**The Invention Rooms**
Work to complete a new visitor entrance on Wood Lane along with a new events, cafe and garden space at The Invention Rooms continues. The refurbished space is expected to open to visitors in December.

**Scale Space**
Enabling and infrastructure works for the new Scale Space development, which include the installation of utility services, raising ground levels, roads and landscaping, continue to progress on site. Meanwhile, building contractors, Western Building Systems, are preparing to start the process for constructing the foundations for new buildings on the Scale Space site in late November.

**COMING UP THIS MONTH**

A large crane is due to be brought on to the north part of the campus on 20 November (weather permitting) to lift chillers and an Air Handling Unit onto site for the Michael Uren Bioengineering Research Hub. The crane will be situated to the east of the building and is due to be on site for three to four days.

**FIND OUT MORE**
Read more about construction activities on campus on our website at:
www.imperial.ac.uk/white-city-campus/consultation/the-campus

**TAKE A TOUR**
A campus tour takes place on the last Friday of every month at 14.00.
