

Imperial College London

Imperial College Tribology Course: Friction Wear and Lubrication

14 - 16 September 2026

Venue: Imperial College London, South Kensington Campus

An intensive course providing a comprehensive and up-to-date understanding of friction, lubrication and wear.

Course aims:

The course will focus on aspects of Tribology relevant to the design and performance of machine components and will cover underlying principles to analyse and solve tribological problems.

Course content:

The course covers a range of topics:

• **Contact mechanics** • **Surface roughness** • **Fluid film lubrication** • **Lubricant chemistry and rheology** • **Boundary lubrication** • **Case studies**

Course details:

Duration: 3 days

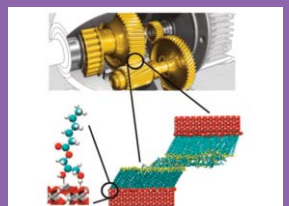

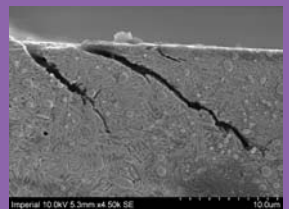

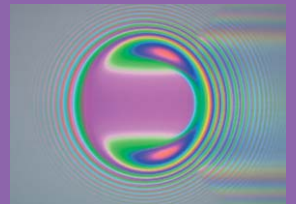

Fees (VAT exempt):

- **£2500** before 31 July 2026

- **£3000** after 31 July 2026

- 25% discount for groups of 3+ attendees

Imperial College Tribology Course: Friction Wear and Lubrication

14 - 16 September 2026

Who should attend?

The course is designed for engineers, scientists and technical managers working within Tribology who need a comprehensive understanding of the subject.

Benefits of attending:

Will provide participants an extensive appreciation and knowledge of the underlying concepts of tribology including friction, wear, lubrication and contact mechanics that can be applied to solve real problems encountered in industrial practice.
