Recommended	★
Supported	🔧
Awareness	🔭

Recommended: These tools have excellent documentation and a good knowledge base within ICT. They're favoured over supported tools due to additional features and stronger integrations. They're the preferred tool for getting the job done.

Supported: These tools are officially supported by ICT. However, some integrations and features may be missing compared to the recommended tools. There may also be a lack of knowledge for these tools compared to recommended tools.

Awareness: These tools are not typically used within ICT and have no active integrations setup. ICT are aware of these tools but currently don't support them.
