Please note that for technical reasons, for the 2022/23 figures, we cannot distinguish between some students who selected 'Prefer Not To Say' in their declaration and those who declared a disability but described their disability as 'Other' from the available options. This report therefore includes, for that year only, some students who selected 'Prefer Not To Say' and thus may or may not have any disability; hence the apparent rise in the number of declared disabilities for that year.
