

24 April 2007

**COLLEGE NOTICE**

**RESEARCH MANAGER**

---

The College is pleased to announce that Dr Celia Caulcott has been appointed as Research Manager, commencing on 3 May 2007.

Working to the Deputy Rector, Professor Sir Leszek Borysiewicz, she will be responsible for the co-ordination of research activity between the Faculties and for promoting the College's central strategic research direction. Collaboration at the boundaries of faculties, departments and centres is an important area of growth and represents a very major opportunity for the College. Dr Caulcott's role will be to facilitate the multi-dimensional and complex series of interactions that constitute modern research and to ensure that external funders see a 'joined up' approach by the various component parts of the College.
