Notes:
Using Your Hob

Supply:

Prevent risk of electric shock. Disconnect it from the power. Do not use the hob if the glass surface is cracked or damaged.

Important Note:

The appliance is not intended to be operated by any child or person with reduced physical, sensory or mental capabilities or lack of experience and knowledge unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

Never place perishable foods, filled 100mm below the hob. Hot items, e.g. dishes, should not be placed on the hob when it is hot. A partition should be placed above a working drawer. When the hob is to be installed, the rangehood should be fitted to the rangehood unit. The appliance should not be placed below a cupboard or shelf.
To use more than one heating zone, just touch the control for the
adjust up or down.

By holding down either of these controls, the power level will
change the heat setting at any time during cooking.

Select any power level from 1 to 9.

Select a heat setting by touching the "+" or "-" controls. You may
select a high setting by touching the 

Touch the heating zone selection control that corresponds to the
zone where the pan is placed (for example, back right).

Place a suitable pan on the cooking zone that you wish to use.

 plaats a suitable pan on the cooking zone that you wish to use.

Ensure the bottom of the pan and the surface of the cooking zone
are clean and dry.

The indicator light of your Hob section for selection of suitable
indicators, that the ceramic hob has entered standby mode.

When the mains power supply is switched on, the buzzer beeps
once and all the indicators light up for 1 second, then go out. This
so will prevent the hob from operating correctly.

Ensure that the brass links are securely fitted. Failure to do
assembled by specialist personnel.

When installing this product we recommend you seek the
advice of another individual.

Over-Temperature Protection

On some models, the Hob will automatically switch off and a default shutdown time may be caused by the hob reaching the Maximum temperature limit. This process above BEFORE the Hob is next switched will be necessary to unlock the hob. The hob will be unlocked after a default shutdown time if it is switched on after a default shutdown time. Check with the hob if the hob is locked. When an excessive temperature is reached, the hob will be unlocked after a default shutdown time. The hob is unlocked after a default shutdown time.

To Unlock the Controls:

1. Touch and hold the key lock control for approx. 2 seconds.
2. The controls are now unlocked and the ceramic hob is now ready to use.

Auto-Shutdown

The ceramic hob is fitted with an auto-shutdown safety feature.

Table:

<table>
<thead>
<tr>
<th>Power Level</th>
<th>Shutdown Time (hours)</th>

The default shutdown times are dependent on power setting as shown here:

- Power setting 1: 2 hours
- Power setting 2: 6 hours
- Power setting 3: 10 hours
- Power setting 4: 14 hours
- Power setting 5: 16 hours

If a cooking zone is accidentally left switched on for a long period, the ceramic hob is fitted with an auto-shutdown safety feature.
Display: Together, the timer is cancelled, and "—" will show in the minute.

To cancel the timer (at any point) touch the "+" and "—" controls.

Display will show the remaining time.

When the timer is set, it will begin to count down immediately. The

indicating that zone is selected.

level indicator will illuminate.

Note: The red dot next to power

return to 0 minutes.

If the setting time exceeds 99 minutes, the timer will automatically

increase in 10 minute increments.

Touch and hold the "+" or "—" control of the timer to decrease or
decrease by 1 minute.

Touch the "+" or "—" control of the timer once to increase or

adjust the time setting by touching the "+" or "—" controls.

Touch the minute selection control (9g back right).

Touch the heating zone selection control (eg back right).
