Welcome back to 3rd Year Students

Professor Paul Robinson
Head, Aeronautics Department

2 October 2018
Welcome back

Congratulations on completing the 2nd year

3rd year counts same as (1st year + 2nd year) i.e. 1/3 of your degree
Scheduling of the exams at the end of year is different from previous two years; exams are at START of summer term.

Tutorial sheets – a key part of consolidating your learning

Workload is high - think about how you are spending your time between the various parts of the course (look at marks to help with this)

Look at what went well and not so well in the first two years – identify improvements you want to make this year (talk with your personal tutor for advice)

Maintain a good balance between academic studies and university life.
Only one summer vacation left before you will be applying for a job.
Best wishes for a successful year
