Please be aware that the information in this handbook is correct at the time of going to print. However, some information may occasionally change during the course of the year – current students will be informed if this is the case. The information provided in this handbook relates only to the academic year specified on the front cover.
1. Welcome to the College

Congratulations on joining Imperial College London, the only university in the UK to focus exclusively on science, medicine, engineering and business.

From Fleming’s discovery of Penicillin to Gabor’s invention of holography, Imperial has been changing the world for well over 100 years.

You’re now very much a part of this community of discovery and we hope you will take this opportunity to make your own unique contribution.

We’re committed to providing you with the very best academic resources to help you reach your true potential.

We also provide a dedicated support network and a range of specialist support services to make sure you have access to the appropriate help, whether that’s further training in an academic skill like note taking or simply having someone to talk to.

We actively encourage you to seek out help when you need it and try to maintain a healthy work-life balance. Our choice of over 380 clubs, societies and projects is one of the largest of any UK university, making it easy to do something different with your downtime. You also have free access to gym and swimming facilities (following an annual fee of £30 in 2018-19) across our campuses.

Our Principles

In 2012 the College and Imperial College Union agreed ‘Our Principles’: a series of commitments made between students and the College. The Principles are reviewed annually by the Quality Assurance and Enhancement Committee and changes recommended for Senate approval.

Imperial will provide through its staff:

- A world class education embedded in a research environment
- Advice, guidance and support
- The opportunity for students to contribute to the evaluation and development of programmes and services.

Imperial will provide students with:

- Clear programme information and assessment criteria
- Clear and fair academic regulations, policies and procedures
- Details of full programme costs and financial support
- An appropriate and inclusive framework for study, learning and research.

Imperial students should:

- Take responsibility for managing their own learning
- Engage with the College to review and enhance provision
- Respect, and contribute to, the Imperial community.

The Imperial College Students’ Union will:

- Support all students through the provision of independent academic and welfare assistance
- Encourage student participation in all aspects of the College
- Provide a range of clubs, societies, student-led projects and social activities throughout the year
- Represent the interests of students at local, national and international level.

www.imperial.ac.uk/students/our-principles
Introduction from the President of Imperial College Union

Hello and Welcome to Imperial!

You’re about to have a brand new start and set off on the next part of your learning career, so on a personal note from me, congratulations on your choice of university because what better place to be than here!

Here at Imperial we really try to live up to the cliché of “something for everyone” and offer as wide and diverse an experience as possible. Imperial College Union is here for all of your needs right from the word go, through your studies and beyond.

Imperial College Union is proud to say we’re an organisation for students, led by students, tackling issues that matter to students. You’ll see your five Officer Trustees, one of which is myself, around our campuses, on posters and sending you all emails. We’re a group of five students that have taken time out of our studies to represent you. If you ever have questions or ideas that your department can’t help with, we’re normally a great place to start.

We have over 380 clubs and societies for you to get involved in which is a great chance to try something new over your time at Imperial. We run your academic and wellbeing representative networks as well as help with student-led campaigns on issues that matter to you. We offer a wide range of volunteering opportunities and have an entire team dedicated to your personal development.

No matter what problems you have or opportunities you are looking for, Imperial College Union is here to help. We're located on Level 2 in Beit Quadrangle or you can check out our website for more information.

Have a great year and I will see you around.

Rob Tomkies

Imperial College Union President 2018-19

2. Introduction to the Department

Welcome from Head of Department

Welcome back to the Department of Bioengineering at Imperial College London and congratulations for having made it to this point. As I did at the start of your career at Imperial, I strongly encourage you to continue to actively engage with the various offerings outside the lecture theatre and lab, to forge and strengthen new friendships and to maintain a focus on excellence in all that you do.

The staff in this Department are committed to your education and we are delighted to play a part in your journey into professional life, so please work with us as we also continue to strive for excellence and improvements in what we do; please maintain contact with the Student Office, your Personal Tutor, and your class mates; and I wish you all a very good year, and look forward to the end of year party in June!

Professor Anthony Bull
Head of Department
September 2018
Welcome from Departmental Student Representative

Welcome back!

If you are reading these words, it means that you made it – you nailed down your exams and projects and you are continuing your journey with the best academics at Imperial, best research and teaching in the UK, best students (meaning you!) and the best departmental music band in the world!

I am Miro and I am your Departmental Representative – for the second year. I am deeply grateful for the confidence you put into me. That means that my job is to make sure that your compliments, suggestions for improvements (a.k.a. constructive complaints) and basically all your opinions are always heard, reflected and respected.

I will be here to represent you at various levels across the College, from the Departmental Teaching Committee, to the College Education Representation Boards. Alongside the year representatives we will be discussing a variety of issues during the Staff-Student Committee meetings, we will be talking with external examiners, and doing many other things to represent your voice.

Having been a Year Rep for last two years, I can confirm that your voice and opinions really matter! We have been able to achieve many positive improvements through constructive discussion with staff members. These can range from addition of a new microwave in the RSM Café to changes in course structures. Therefore, no matter how tiny your issue is, do not hesitate to let me or your Year Reps know. Even small suggestions can lead to significant developments and allow us to keep our reputation as one of the best Bioengineering departments in the world – and not only academically! Furthermore, we have a College-wide curriculum review ahead of us, and all your comments and thoughts will be immensely helpful and appreciated.

I do not think that I need to give you many practical tips regarding student lifehacks, academic tips or the best places to get coffee on campus. You know it all (if you do not, please let me know urgently!). However, this does not mean that you should not stop me or your Year Reps for a chat at any time – I will be here for you, ready to talk or to go for a coffee (I drink loads of it, so I can drink it with you as well 😊). And never forget that we have awesome staff members and lecturers here at Department of Bioengineering, so never be afraid to speak with them!

In a short time, some of you will work for big companies, some will start your own, and some of you will become famous researchers. However, I hope that all of you will always keep the time you spent at Imperial in your memory as one of your best experiences and I am ready to help you with that!

And now enough talking and let’s start... again!

Miro

Miroslav Gasparek

Department of Bioengineering Student Representative
Welcome from Imperial College Bioengineering Society

Welcome back!

Oh boy, how time flies! It feels like just yesterday we were all freshers, but now we’re here, halfway there. But how was your summer? Many of you went on to do internships at companies or at research groups, or both! Or you possibly made others jealous by your pictures from the beach or travelling, but whatever the case, the ICBE committee hopes that you found value in your summer activities and that you’re ready for your 3rd year!

You may know who we are and what we do, but do read on!

Before the fun stuff, a bit of history and formalities: ICBE is a constituent society of the Imperial College Union (ICU) and is under the wing of the City and Guilds College Union (CGCU). Since the society was established just over a decade ago by a group of enthusiastic MSc students, ICBE has been run with the aim of broadening the experiences of Bioengineering students beyond that of the curriculum. Are you an undergraduate (MEng) or postgraduate (MSc, MRes, PhD) student? In that case, then you are a member of ICBE!

As your Departmental Society, ICBE organises and executes the socials, careers fair, trips and networking opportunities for you to grow as a Bioengineer at Imperial, but also to enjoy your time here as a student! Everyone in the committee chose to volunteer and serve all other Bioengineering students by offering these opportunities to you, and we hope that you will find value in all the events that you attend.

Now here’s the fun stuff: Did you hear about our infamous Christmas Dinner social, networking with entrepreneurs and getting internship advice? Then you heard right! ICBE organises yearly Christmas Dinners and subsidized trips to other cities (in the past: Bristol, Brighton, Bath). Besides socials, you will have the opportunity of hearing from your fellow Bioengineers, who will share their summer internship or research experiences, or from biotech start-up CEOs and senior entrepreneurs, whom you will also have the opportunity of networking with!

In recent years, ICBE has co-organised a 2-day IC HealthHack, a novel hackathon that focuses on the creation of software and hardware solutions to healthcare problems. You too will have the opportunity to take part in the next hackathon we organise and further develop your technical skills!

Is there anything else you would like to see? Then please contact us (see email below) or anyone in the committee about your ideas. We would love to hear from you!

But for now, everyone at the ICBE committee genuinely wishes you a great 3rd year ahead at our amazing Department of Bioengineering and that you continue to grow as a Bioengineer at Imperial!

To keep up to date with our upcoming events or to contact us, see the links below:

Email: bgsoc@ic.ac.uk

Website: https://www.icbe.co.uk/
Using this handbook

The handbook contains very important information for your academic life, and also for your life at Imperial College London outside of work. You should read the handbook as soon as possible after you receive it so that if an issue arises, you know what action to take, or at least know that the information on what action to take is available to you.

You will be issued with a copy of the handbook for your programme and year of study in week one of autumn term, and you will also be able to access the PDF document online from the current Undergraduate students’ page of the Department of Bioengineering website.

Information specific to each year of each programme is included in the relevant handbook, and information is updated annually, so it is important you read the relevant handbook at the start of each year of study you undertake with us.

Included in this handbook is essential information about:

- What to do if you run into difficulties affecting your academic life
- What to do if you run into difficulties in your personal life, such as illness
- Departmental and College contacts and resources available to you
- The structure and content of your degree programme and year of study.

There are a number of other important sources of information from the Department, and we would encourage you to make use of these.

Useful links, module descriptors, timetable information and year-specific information can be accessed via the Current undergraduate students’ page on the Department of Bioengineering webpages, at http://www.imperial.ac.uk/bioengineering/admin/current-ug/.

There is an information board outside the Student Study Room (3.06 RSM).

Important information will be communicated to you via email, so please ensure you check your College email address regularly.
Key academic staff

Professor Anthony Bull
Head of Department
Professor of Musculoskeletal Mechanics
PA: Ms Angela Glyes
a.glyes@imperial.ac.uk

Professor Martyn Boutelle
Deputy Head of Department and Director of Courses
Professor of Biomedical Sensors Engineering
m.boutelle@imperial.ac.uk

Dr Sylvain Ladame
Senior Lecturer
MEng Molecular Programme Director
s.ladame@imperial.ac.uk

Professor Manos Drakakis
Senior Tutor
Professor of Bio-Circuits and Systems

a.aofolaju@imperial.ac.uk

Mr Ken Keating  
Laboratory Manager  
+44 (0)20 7594 5170  
k.keating@imperial.ac.uk
Important procedures
From time to time unfortunate events can happen and so it is important that you are familiar with these procedures, so that you know who to contact and what to do in case of an emergency or serious problems.

1. If there is any fire, medical or security emergency:

In an emergency, dial extension 4444 from any internal phone or 020 7589 1000. This line is supported 24 hours a day. State your exact location, your name and extension number. Security Control will immediately mobilise the required emergency services. Do not ring 999 – Security will coordinate this to ensure that the emergency services gain site access.

If you discover a fire, immediately press the nearest red alarm call point. Warn people in the vicinity. Evacuate the building and be ready to tell Security and Fire Officers where the fire is.

Read more about our Health and Safety procedures in Section 14 - ‘Health and Safety’.

2. If you are ill and think you may miss an exam or major assessment deadline:

You should do both of the following:

   a. Immediately contact the Department via one of the below channels:
      i. Student Office: Ms Rebecca Pointer: +44 (0)20 7594 5122 (r.pointer@imperial.ac.uk) or Ms Maddi O’Brien +44 (0)20 7594 9296 (m.obrien@imperial.ac.uk) or one of the Student Administrators
      ii. Senior Tutor : Professor Manos Drakakis : +44 (0)20 7594 5182 (e.drakakis@imperial.ac.uk)
      iii. Academic Tutor: Mr Martin Holloway: +44 (0)20 7594 5176 (m.holloway@imperial.ac.uk)

   b. Contact a registered medical doctor as soon as possible for an examination - they are the only people who can pronounce that you are medically unfit to take an exam.
      i. You must follow the mitigation procedure and it is vital that you obtain a medical certificate from a registered doctor. This is necessary to support your mitigation request.
      ii. We highly recommend that you obtain a medical certificate by contacting the Imperial College Health Centre - they are equipped to help in this situation, and if you attend as soon as you can after 8.30am, stating that you have an exam, they will make sure that you get seen quickly.

        Imperial College Health Centre: +44 (0)20 7584 6301 (imperialcollege.hc@nhs.net).

3. If you, or a friend, are/is suffering stress or depression:

   a. If at all possible, contact someone in the Department such as your Personal Tutor, the Senior Tutor or the Academic Tutor:
      Senior Tutor: Professor Manos Drakakis: +44 (0)20 7594 5182 (e.drakakis@imperial.ac.uk)
      Academic Tutor: Mr Martin Holloway: +44 (0)20 7594 5176 (m.holloway@imperial.ac.uk).

   b. Contact the Health Centre (details above) or the Student Counselling Service:
      +44(0)20 7594 9637 (counselling@imperial.ac.uk)

   c. The Student Space website has lots of useful information on dealing with stress, and where to find additional help and support: http://www.imperial.ac.uk/student-space/.

4. Illness, absence, or inability to submit coursework

   a. If you have to be absent through illness or for any other personal reasons, you must let the Student Office (details above) know as soon as possible. If you are likely to miss a coursework, lab or exam deadline, please ensure you contact the Student Office without delay. You may need to submit a mitigation request.
b. It is important that you familiarise yourself with the information about absences in the section ‘Attendance and Absence’.

**English language requirement**
If you are not a native English speaker you must meet the College’s English language requirements.

See the Admissions website for details:

![www.imperial.ac.uk/study/ug/apply/requirements/english](www.imperial.ac.uk/study/ug/apply/requirements/english)

For information on English language support available while you’re here, see the section in this handbook on support for international students.

**Attendance and absence**
You are expected to be in attendance from the first day of each term to the last day of each term. You can view the term dates online at: [http://www3.imperial.ac.uk/registry/information/termdates](http://www3.imperial.ac.uk/registry/information/termdates).

You must maintain regular attendance and make acceptable academic progress. While you are responsible for their own learning, there is an expectation that you will take full advantage of the learning opportunities provided, attending all timetabled sessions of the degree programme.

You must inform the Student Office if you are absent from the College for more than three days during term. If the absence is due to illness you must produce a medical certificate after seven days. If you miss an examination through illness you must contact the Student Office before your exam on the day and provide a medical certificate within five working days. If illness has impacted on your ability to take assessment, you should seek advice and support about making a claim for mitigating circumstances.

The Registry will be informed of all student non-attendances as the College is obliged to report the non-attendance of students on Tier 4 visas to the Home Office.

Should you choose to absent yourself from the degree programme without authorisation you should be aware that you are missing valuable teaching experience which you will need to prepare fully for future examinations. This might mean that you find yourself in a situation where you are in danger of being required to withdraw from the degree programme because of examination failure.

The Student Office keeps students’ attendance under constant review and warn them if they feel it is inadequate. Problems of non-attendance will be reported to the Director of Courses and Senior Tutor who will inform Personal Tutors and together will make recommendations on any remedial action that might be appropriate.

In the event of there being insufficient improvement following a warning, the Director of Courses or the Senior Tutor may, at their discretion and following investigation, require the student to repeat part of the degree programme; or, should they decide that the student’s academic record and/or application is inadequate or that the student is unable to profit from continuing the programme, they may require the student to withdraw. Students have the right of appeal.

**Holidays**
You are expected to be in College during term time. Timetables for our programmes include breaks at Christmas, Easter, and in the summer (for UG students – PG students are expected to work on projects over the summer).

**Absence due to illness**
If you are absent from the College due to illness for more than two consecutive days, the following procedure must be followed:

1. Inform the Student Office that you are absent through illness as soon as possible in person, by telephone on +44 (0)20 7594 5122 or +44 (0) 20 7594 9296, or if that is not possible then by email to a Student Administrator.
2. If you have been absent for more than five consecutive working days, documentary evidence should be obtained and submitted - e.g. an official doctor’s certificate. The documentation should be submitted to the Student Office except in the case where additional confidentiality is essential, in which case it should be submitted to the Senior Tutor or Deputy Senior Tutor, and the Student Office should be notified that it has been submitted.

Students who receive a grant and who are absent due to illness for more than 14 days must inform their Local Education Authority; if a student is too ill to do this the information should be sent by the parent or next-of-kin. Illness can only be taken into account in assessing the significance of poor attendance, work or examination results if the illness has been reported at the time it happened to the student’s doctor, and a medical certificate submitted to the Department.

**Special or Compassionate Leave**

If it is necessary for you to be absent from the College for any reason other than personal illness, permission must be sought from the Department, via the appropriate form available on our website at [http://www.imperial.ac.uk/bioengineering/admin/current-undergraduate-students/](http://www.imperial.ac.uk/bioengineering/admin/current-undergraduate-students/).

This might include a period of absence if you have suffered a close family bereavement, or wish to participate in a major cultural or sporting event.

This request form must be submitted along with any evidence to the Student Office in advance of the absence, leaving enough time for it to be considered and a decision made on whether the absence is accepted or not.

Requests should normally be submitted in writing using the form.

In urgent circumstances where the following criteria are met, approval may be given following a telephone call to the Student Office in the Department on +44 (0)20 7594 5122 or +44 (0)20 7594 5176:

- Absence is necessary at very short notice (e.g. in the case of a close family bereavement), and
- There is a strong precedent for approval to be given (e.g. family bereavement)
- The period of absence will be less than three days.

The procedure for submission of an absence request is as follows:-

1. Inform the Student Office that a leave of absence is being requested as soon as possible in person, by telephone +44 (0)20 7594 5122/ 020 7594 9296 or if that is not possible then by email (r.pointer@imperial.ac.uk and m.obrien@imperial.ac.uk)
2. Any documentary proof of the reasons for absence should be obtained
3. Complete and submit, as soon as possible, the form and documentary proof requesting leave of absence. The form should be submitted to the Student Office except in the case where additional confidentiality is essential, in which case it should be submitted to the Senior Tutor or Deputy Senior Tutor, and the Student Office should be notified that it has been submitted
4. The request will be considered and the student will be informed as soon as possible whether the request has been accepted or not. Absence taken without acceptance of the request may lead to disciplinary measures.

**Interruption of Studies**

If you should experience a personal emergency or other circumstances arise which necessitate a break in your degree programme, you may need to apply for an interruption of studies (IOS). This is like pressing a pause button on your degree. This will effectively suspend your registration until you are able to return to College. No fees are payable during such a period. If you think you need to apply for an interruption, you should contact your Personal Tutor in the first instance and then the Student Office (RSM 3.21c), who can arrange the paperwork and explain how IOS works.
Student Records

Details relating to unsatisfactory attendance may be placed on a student’s confidential file and made available to Personal Tutors, taken into consideration by and at the discretion of Boards of Examiners, and used as evidence in cases of student appeals and complaints.

Who to speak to if you need help

There are a lot of people and resources in place to support you during your time at Imperial College London. Don’t suffer in silence - we take the welfare of our students very seriously indeed and will try to provide all the help that we can if you encounter problems of any sort. If we can’t help directly, then we will direct you to someone who can.

### Key dates 2018-19

#### Term dates

**Autumn**
Saturday 29 September 2018 – Friday 14 December 2018

**Spring**
Saturday 5 January 2019 – Friday 22 March 2019

**Summer**
Saturday 27 April 2019 – Friday 29 June 2019

#### Bank holidays

- **Christmas Day**: 25 December 2018
- **Boxing Day**: 26 December 2018
- **New Year’s Day**: 01 January 2019
- **Good Friday**: 19 April 2019
- **Easter Monday**: 22 April 2019
- **Early May Bank Holiday**: 06 May 2019
- **Spring Bank Holiday**: 27 May 2019
- **Summer Bank Holiday**: 26 August 2019

#### College closures

- **Christmas**: Saturday 22 December 2018 – Tuesday 1 January 2019 (Inclusive)
- **Easter**: Thursday 18 April 2019 – Tuesday 23 April 2019 (Inclusive)

---

3. Programme information

Your student journey
Welcome back to the third year of your degree programme! Well done on all of your achievements so far. We hope you had a great first two years and are looking forward to furthering your knowledge in the coming years.

As you know, you spent both first year and second year of your degree building a solid base of core knowledge through compulsory modules. Now, the focus is on you developing your knowledge and skills in particular areas. The MEng Biomedical Engineering programme has three pathways, allowing you to specialise in: Mechanical Engineering, Electrical Engineering or Bioengineering. You can find out more about the programme structure and pathways information later in this handbook, or by consulting the programme specification for your intake year.

For a range of reasons, the qualifications you leave university with will vary. Some may complete the MEng programme, perhaps with a year in industry, and then stay on at the College to complete a research degree programme, or go elsewhere to study further. Others may go straight into employment or travel after finishing their programme.

No doubt, you already know that university students are expected to take responsibility for their own learning and welfare – but do remember there are lots of people and resources in place to support you, so please do make the most of them and ask for help or information if you need it.

The third year is designed to build on the knowledge and skills gained in the first two years of the programme. It’s also when you have the opportunity to specialise in an Electrical Engineering, a Mechanical Engineering, or a Biomolecular Engineering pathway. In the third and fourth years the emphasis is on your individual study and selecting optional modules in your area of interest. All third years still take some core modules and complete a group project, as well as selecting optional modules.

As in every year, we recommend you get involved with Departmental life and also explore some of the clubs and societies outside of your academic area.

Many of you will be thinking about summer internships, placements and careers. You can find out more about careers later in this handbook, on the Departmental website or through the College’s Careers Advisory Service.

Later in the handbook, there is a list of people and resources which you may find useful throughout your degree.

Overview of programme
Students are admitted with high grades in three to five STEM subjects. The first year is designed to ensure that all students achieve a common breadth and depth of knowledge in Mathematics, Physics, Chemistry, Biology and Medical Science. The second year builds upon the first year to provide a platform for specialisation.

Practical skills (that complement technical modules) are gained in the first two years in the context of wet and dry laboratories. Design, test and build activities start in the first year, and group working is introduced in Freshers’ week, as collaboration in interdisciplinary teams is a key feature of working as a professional Biomedical Engineer. The second year includes a substantial group project. Broader issues such as Ethics are also covered.

In the first two years all modules are compulsory and are delivered in the department. Thereafter students may elect to take some modules in other departments of the Faculty of Engineering. Our students attend the same lectures and take the same assessments as the senior year students in the hosting department. This confirms that the first two years have provided a solid platform for specialisation. The knowledge, understanding and skills acquired throughout the Faculty will be translated into a Bioengineering-themed final year individual project.
After two years of compulsory courses (taught in-house), progression onto the third year of the MEng course requires an overall mark of at least 60%. The Director of Courses has the discretion to condone a near miss to this requirement. Otherwise, students are obliged to move to the third year of the BEng programme. The MEng programme has three pathways: Electrical Engineering, Mechanical Engineering and Bioengineering. The pathway choice determines the modules that are compulsory and a set of optional modules. However, there is still scope to take optional modules outside the pathway.

Students entering the final year have no courses that are compulsory, but can choose all of their courses. This allows them to follow the topics that may have caught their interest, or for them to keep their options open. Much of the final year is spent on their individual project, and this is reflected in the mark weighting of the project.

Programme Learning Outcomes
The programme has been designed so that graduates will be able to demonstrate the following UK-SPEC general learning outcomes:

Knowledge and Understanding:
- The underlying scientific principles and engineering, mathematics and computational tools that underpin Biomedical Engineering
- The core concepts, principles and theories of Electrical Engineering, Mechanical Engineering and Materials Engineering deployed in a Biological and Medical context
- Innovative and creative engineering solutions applied to healthcare problems and quality-of-life issues
- Moral and ethical issues (including professional conduct) and the role of the Professional Engineering Institutes.

Intellectual Abilities:
- The application of engineering principles to the analysis and design of Biomedical applications
- The application of functional decomposition to manage the development of large scale complex systems
- Critical evaluation of information gathered from academic and technical resources.

Practical Skills:
- Develop graduate attributes including global challenges, business and economics and humanities
- Plan and safely execute experiments in diverse types of laboratories.

General Transferable Skills:
- Build team working and communication skills.

Additionally, MEng graduates will be able to demonstrate:
- Greater depth and breadth of knowledge and understanding of engineering applied to healthcare problems and quality-of-life issues
- Additional application of knowledge and understanding in individual and group project work.

---

**Modules**

You can find detailed information about the modules which you are studying on the Department’s website at [http://www.imperial.ac.uk/bioengineering/admin/current-ug/options/](http://www.imperial.ac.uk/bioengineering/admin/current-ug/options/) or via Blackboard.

**Year weightings in the programme**

The years of the programme are weighted 1:2:3:3. This means year one counts for 11.1%, year two counts for 22.2%, year three and year four count for 33.3% each.

**How the programme will be delivered**

You will experience a variety of teaching and learning methods, which combine theory and practice:

- Lectures
- Tutorials
- Study groups
• Laboratory sessions
• Make, build and test activities

The laboratory sessions will include wet, computing and mathematics laboratories, which provide a practical element to teaching and assessment.

**Study groups, problem classes, tutorials and practicals**

For many subjects, there are study groups in addition to the lectures. These study groups/tutorials play a very important role in supporting your engineering education, and are widely used at Imperial College London. In some modules, Study Groups are described as Problem Classes or Tutorials. This may be simply down to the preference of the individual module leaders, or may reflect the nature of the module subject matter or style of sessions.

Study groups, problem classes and tutorials are very important and it is essential that you attend. These sessions give you a chance to develop your knowledge and apply your understanding, as well as ask questions and discuss key concepts. We monitor your attendance at these classes, and the attendance record is one of the factors taken into account by the Examiners when considering the outcome for students who fail the year.

For many of these classes, you will be assigned problem sheets to attempt. Lecturers or teaching support staff may ask to see your answers, although the problems may not be formally marked or assessed. It is very important to attempt the set material. Only by doing so will you be able to acquire the skills for using the module material, rather than learning facts. We monitor participation in these sessions, and students who consistently fail to attempt the problems will be brought to the attention of the Director of Courses. Likewise, attendance at practical or laboratory sessions is compulsory. Attendance at practicals will be monitored, and students who fail to attend practicals regularly will be noted.

**Progress tests**

In addition to the problem classes, there will be a series of progress tests in some subjects. The purpose of these progress tests is to ensure that you are keeping up with the course of the programme. Whilst the progress tests may not contribute to your final degree result, poor performance in a test will be considered very carefully by the Director of Studies and/or the Senior Tutor. Failure to attend a progress test will be noted. It is possible that students who are performing poorly in these tests will be asked to withdraw from the degree programme. You will be given tests in some subjects that will be marked and whose purpose is to evaluate your progress and to allow remedial measures to be taken if necessary. These tests may or may not contribute to the final mark for the module – this will be clear to you at the time.

**Coursework**

During your degree, you will work on various sorts of exercises to be carried out outside the classroom. These will include problems, design projects, practical reports and essays. Many courses have associated coursework, and in each year, there will be formal coursework assessments in several subjects. There are very strict deadlines for the submission of assessed coursework. You should plan your work so that you can complete these assignments in the appropriate time.

Failure to complete assignments can lead to failure of the year. Some work will be formally assessed and consequently contribute to your final mark for the year and consequently for the whole degree programme. If you are in danger of missing a deadline, submit such work as has been completed. We cannot extend deadlines for coursework without being unfair to the entire cohort of students. Firm deadlines also assist the staff in returning marks and any comments on your work promptly.

The pass mark for each assessment is 40%. If you don’t produce coursework of an adequate standard then you will need to retake the year.

Practical reports and design projects will normally contribute formally to your overall end-of-year assessment. You will need to certify that they are your own work.
Coursework marks will either be returned to you by the responsible lecturer or will be available from the Student Office or on Blackboard, the College’s Virtual Learning Environment (VLE).

Coursework must be your own work and not copied, or plagiarised, from others. Most coursework will be submitted electronically via Blackboard, which has a plagiarism detector called Turnitin. For more information on plagiarism, please see the section on ‘Plagiarism’ in this handbook.

Professional skills development
You will have a number of opportunities throughout the programme to enhance your professional skills: such as working in teams (e.g. in the group project), giving presentations (in some modules and in projects); and solving problems. The Department’s Industrial Liaison Manager also runs a number of workshops, networking sessions and seminars to help you hone your skills.

Selecting elective modules
In your first and second year, you will not have any optional (elective) modules. In your third and fourth years you will be able to select some of the modules you study, so you can tailor your programme to your own interests.

Elective modules may only be chosen within the constraints specified for the relevant year and it should be noted that not all combinations of optional modules may be possible due to timetabling constraints.

In 2018-19 elective module selection will be via the Departmental Student system (DSS), accessible at http://www.imperial.ac.uk/dss.

You must use DSS to select both your compulsory specialist modules and your elective option. Please ensure you select only the modules available within your stream.

Once you have selected your modules on DSS, you will be enrolled in Blackboard. The system refreshes overnight so you may not see the modules appear in Blackboard straight away.

For some modules outside of the Department of Bioengineering, module selection is not via DSS. You will be informed of the appropriate module selection process for the relevant Departments at the start of term.

Module selection will close at the end of October and you will have to submit a form to request a change, if you wish to change your elective modules after this date.

Further instructions on module selection will be provided via email at the start of the academic year. If you have any difficulties or questions please speak to someone in the Student Office.

Year in Industry & Year Abroad
As part of the MEng Biomedical Engineering programme, you have the option of applying to switch to either the MEng Biomedical Engineering with a Year Abroad (BHV1) programme, or the MEng Biomedical Engineering with a Year in Industry (BHV2) programme.

Year in Industry
The year in industry is taken between the third and fourth years of study, so extending the degree to five years in total. You can decide in your third year if the Year in Industry is an option you would like to take. You can find out more about placements on the Bioengineering website at http://www.imperial.ac.uk/bioengineering/admin/current-ug/placements/ and more about the Year in Industry via the College website at http://www.imperial.ac.uk/careers/opportunities/internships/industry/#courseplacement. You can also contact Mr Robert Ferguson, the Industrial Liaison Manager, in the Department, for further information.

Year Abroad
Students who undertake the Year Abroad programme spend their final year overseas, at one of several international institutions. Up to two students are selected through a competitive process every
More information, including details of which institutions exchange programmes are available at, is available on our website: [http://www.imperial.ac.uk/bioengineering/admin/current-ug/fourth-year-abroad](http://www.imperial.ac.uk/bioengineering/admin/current-ug/fourth-year-abroad). You can also contact Dr Firat Guder, the Undergraduate Exchange Programme Coordinator, for more information.

**Timetables**

Your timetable will be made available at the beginning of term. The Department publishes year-group timetables online on the following page but students are always advised to consult their own personal timetable in the first instance: [http://www.imperial.ac.uk/bioengineering/admin/current-ug/programme-administration](http://www.imperial.ac.uk/bioengineering/admin/current-ug/programme-administration).

**Projects**

During your time at Imperial you will work on a number of projects as part of your programme of study. You will be given a Project Handbook which provides you with lots of useful information to help with your project work.

You can find out more about projects on the website at: [http://www.imperial.ac.uk/bioengineering/admin/current-ug/projects](http://www.imperial.ac.uk/bioengineering/admin/current-ug/projects).

You can find out more about some of the project work previous students have completed on the website at: [http://www.imperial.ac.uk/bioengineering/study/student-impact](http://www.imperial.ac.uk/bioengineering/study/student-impact).

**Reading lists**

Reading lists for each of your modules can be found online as part of the module descriptors or will be supplied directly by the lecturers. The College Central Library has copies of all the textbooks you will need so there is no need to rush out and buy copies of them! The Department also has a small collection of books which you are welcome to use but you may not take away from the Department.

**Reading week**

Every term, there is a Reading Week, usually Week 7 of term. The Reading Week is free from lectures (but study groups and labs do still take place) and is meant for reading, studying and catching up. The following rules apply to reading week:

1. You are expected to remain present and assessable during Reading Week. The UKVI and College regulations require you, as an enrolled student to be present during term time. Absences are not allowed unless they are necessary and these must be authorised in advance. A request for absence can be made with the appropriate form, available online from [http://www.imperial.ac.uk/bioengineering/admin/current-ug](http://www.imperial.ac.uk/bioengineering/admin/current-ug).
2. There will be no lectures in Reading Week so you can catch up with learning and also work on coursework or projects.
3. GTA (Graduate Teaching Assistant) led laboratories/practicals and study groups will run during Reading Week so you can continue to get GTA support. Attendance at these labs and study groups is still mandatory.
4. The Reading Weeks apply to Bioengineering modules only. If you take modules in other Departments you will probably have lectures during our Reading Week. Although some Departments also have a Reading Week, it might not be the same week as ours.

**Competency Standards**

The Department's competency standards can be accessed online at: [http://www.imperial.ac.uk/bioengineering/admin/current-ug/programme-administration](http://www.imperial.ac.uk/bioengineering/admin/current-ug/programme-administration).

**Module Descriptors**

Module descriptors can be found online at: [http://www.imperial.ac.uk/bioengineering/admin/current-ug/options](http://www.imperial.ac.uk/bioengineering/admin/current-ug/options).
Horizons

The Imperial Horizons programme offers a wide range of courses for all Imperial College undergraduates. It is designed to broaden your education, inspire your creativity and enhance your professional impact. How you are able to participate in the Imperial horizons programme will vary depending on your year of study.

On the MEng Biomedical Engineering programme, you can take a Horizons module outside of your degree programme in years 1 and 2. In year 3 you have to take a Horizons or BPES module as part of your programme.

Find out about course options on the Horizons programme for first years on the website: http://www.imperial.ac.uk/horizons/course-options/first-year-undergraduates/.

Business for Professionals of Engineering and Science (BPES)

In your future career as an engineer or a scientist, Business for Professionals of Engineering and Science (BPES) from Imperial College Business School will be of immense benefit to you. You’ll gain an understanding of the financial, strategic, operational and organisational context in which engineering and science takes place.

By combining your studies with modules delivered by the Business School, you will graduate with a powerful array of skills that will give you the flexibility to alter the direction of your career in response to changes in the workplace environment.

On the MEng Biomedical Engineering programme you can choose to study one BPES module in year 3 and also in year 4, as part of your degree programme.

Find out more about BPES at: https://www.imperial.ac.uk/business-school/programmes/undergraduate-study/bpes-programme/

Imperial Mobile app

Don’t forget to download the free Imperial Mobile app for access to College information and services, including your programme timetable, College emails and a library catalogue search tool.

www.imperial.ac.uk/imperialmobile

Imperial Success Guide

The Imperial Success Guide is an online resource with advice and tips on the transition to university-level study. More than just a study guide, it is packed with advice created especially for undergraduate students, including information on support, health and well-being and ideas to help you make the most of London.

www.imperial.ac.uk/success-guide
4. Accreditation

What is a professional engineering qualification?
Engineering is a vocation. A professional qualification demonstrates that you have achieved the highest level of competence for your chosen vocation. Specifically, you have achieved the competencies specified in the Dublin, Sydney and Washington accords. For a professional engineer, an academic qualification is a stepping-stone towards obtaining a professional qualification.

The main professional engineering qualifications in England is the CEng qualification, in Europe it is the Eur Ing and for the rest of the world it is the Int PE. All three qualifications are based on the same aforementioned accords. Each qualification is mutually acceptable to the other organisations that administer professional registration. This means your academic accreditation can be cashed-in for professional registration anywhere in the world.

A professional qualification is effectively an international passport to practice engineering. In some countries a professional engineering qualification is a pre-requisite for employment. In all countries it is a definite advantage since it demonstrates that your work since graduation has been peer reviewed. Thereby affirming that you have achieved a high-level of professional competency over a period of several years. Affirmation from your peers confirms that you have used your knowledge, understanding and skills in a useful way working as a professional engineer.

What is academic accreditation?
To obtain a professional engineering qualification you need an academically accredited degree. If you have one, then your work since graduation will be evaluated against the graduate level learning outcomes specified in the aforementioned accords.

Academic accreditation of an engineering degree programme means that the programme has met the high standards set by the engineering profession, and re-tested every 5 years. Standards for accreditation of engineering programmes in the UK are set by the Engineering Council, which is the regulatory body for the profession, in consultation with the discipline-specific Professional Engineering Institutions (PEIs).

Our degree programmes are unique for a named engineering degree since we have satisfied the requirements of four PEI’s, which underlines the depth and breadth of our programmes. Our degree programmes have the breadth of a general engineering degree, but through your pathway/stream selection your degree has the same depth as four sub-branches of engineering.

Your pathway/stream selection on your degree programme means that when you graduate you will have a strong alignment with one of the PEI’s. You should then become a member of that PEI, who will then mentor you through the years from graduation through to professional registration.
What are the benefits of accreditation?
Accreditation means that you can be sure that your degree programme provides a solid underpinning in the subject and meets the current and future needs of employers. It will be current, relevant and well-regarded within the discipline. Graduating with an accredited degree provides you with a competitive advantage in the jobs market, and offers you international job mobility.

Professional accreditation of our programmes
An academically accredited degree can be achieved either with an undergraduate Integrated Masters degree (e.g. a MEng) or the combination of a three year undergraduate and a one year postgraduate degree programmes (e.g. BEng + MSc). If your registration is based on two degrees and one of your degrees has not been accredited, it means that you will need to offer extra years of graduate level work experience in-lieu of the absence of an accredited degree.

The BEng and MSc Biomedical Engineering programmes are accredited by four PEI’s on behalf of the Engineering Council for the purposes of fully meeting the academic requirement for registration as an Incorporated Engineer (IEng) and partly meeting the academic requirement for registration as a Chartered Engineer (CEng).

The MEng Biomedical Engineering programme is accredited by four PEI’s on behalf of the Engineering Council for the purposes of fully meeting the academic requirement for registration as a Chartered Engineer (CEng).

The table below shows the start and end dates for our academic accreditation. The accreditation is awarded for a maximum period of 5 years. Therefore, we apply for academic accreditation periodically, such that the end dates shown below will be extended, without any intermediate years without accreditation.

You can find out more about the PEIs at:
IPEM: [http://www.ipem.ac.uk/](http://www.ipem.ac.uk/)

You can find out more about the Engineering Council at: [http://www.engc.org.uk/](http://www.engc.org.uk/).
5. Assessment

Rules of Progression

Year One
In order to pass the first year examinations and qualify to progress to second year, the candidate must achieve a pass mark in every assessment. In addition they must achieve an aggregate mark of at least 40% for Electrical Engineering Labs, Vibrations and Waves, Biomolecular Engineering 1, and Programming 1.

Year Two
In order to pass the second year examinations and qualify to progress to the third year, the candidate must achieve a pass mark in each assessment.

Year Three
In order to pass the Part 3 examination and proceed to Part 4 of the MEng degree, the candidate must satisfy the conditions for Parts 1 and 2 and following conditions on subjects taken for Part 3:

(a) achieve a pass mark for each compulsory course
(b) achieve an overall average mark of at least 40% across the optional courses
(c) achieve a pass mark in the group project.

In general, the regulations for courses taken outside of the Bioengineering Department will follow those of the host Department (ME, BS, DOC, CE, MM) except under exceptional circumstances where the final decision lies with the Director of Undergraduate Studies of Bioengineering.

Students who do not fulfil the requirements to pass year 3 MEng at first attempt are required to transfer to, and proceed onto the final year of, the BEng course.

Year Four
A student must:

- Achieve a mark of at least 40% in each module. A student may be condoned in modules up to the value of 15 ECTS with a qualifying mark of at least 30%*. The following modules may not be condoned:
  - Individual Project

* Note that condonement is always at the discretion of the external examiners and under normal circumstances the Department will only condone modules up to the value of 10 ECTS in order to meet the requirements of our accrediting bodies. The Exam Board would normally not condone more than one failed module, nor any modules with mastery examinations where a student has failed all three attempts.
Final Degree Classifications

- Third – a student must achieve an aggregate mark of 40%
- Lower Second – a student must achieve an aggregate mark of 50%
- Upper Second – a student must achieve an aggregate mark of 60%
- First - a student must achieve an aggregate mark of 70%

Grade descriptions

In UK universities, exams and coursework are set to challenge all students, even the best. Typically, modules have a mean mark in the range 60-70%. This is very different to, for example, Grade Point Average systems used in other countries, where the class mean is much higher. While exam marks are determined by the mark schemes, the following grade descriptors may be helpful in explaining what the examiners are looking for.

<table>
<thead>
<tr>
<th>Class: Mark</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st 70%+</td>
<td>An excellent piece of work that is well set out, lucid, unambiguous and factually complete. Indicates that the student has a good grasp of the concepts and mechanisms involved. Includes a critical or creative contribution. Good diagrams where appropriate.</td>
</tr>
<tr>
<td>Upper 2nd 0-69%</td>
<td>A clear exposition that contains the essential material, (including basic mechanisms, concepts) and sufficient additional material to show that the student has a good understanding of the subject. Good diagrams where appropriate. Normally free from errors in reasoning.</td>
</tr>
<tr>
<td>Lower 2nd 50-59%</td>
<td>An adequate presentation, which includes most of the essential material logically presented with indications that it is understood rather than simply regurgitated.</td>
</tr>
<tr>
<td>3rd 40-49%</td>
<td>Presentation of some of the basic facts/mechanisms but with little detail and some omissions and errors.</td>
</tr>
<tr>
<td>Fail 39-30%</td>
<td>Facts rather thin, with some material confused or presented in an ambiguous manner that suggests that the student does not fully understand the appropriate concepts.</td>
</tr>
<tr>
<td>Bad Fail 29% or less</td>
<td>Clearly lacking in content. Confused or erroneous reasoning. Major point(s) omitted and errors of fact.</td>
</tr>
</tbody>
</table>

Examination timetables

The Department's main exam periods are in December/January and May/June. Exam timetables are typically released in November for the December/January exams, and in March for the May/June exams. Once the exam timetable is set and published it will not be changed. It is entirely possible that you may have an uneven distribution of exams and you should be prepared to have several exams in one week. We do our best to avoid any students having to sit two exams in one day, but it does occasionally happen and so you should be prepared for this. Do not leave all your revision to the last minute!

If, when you see the exam timetable, you think that you have a clash (e.g. two or more exams scheduled at the same time) then please come to the Student Office and we will be able to help.

The Department of Bioengineering does not provide information about exams for modules run by other Departments – you have to find and check this information yourself. This is only relevant for
students in their third year or above (in your first two years you will only study modules within Bioengineering).

**Accessing past examination papers**
You can access past examination papers via Blackboard to help you in your revision.

**Re-sit re-entry rules**
Students failing their first attempt at the year may, at the discretion of the Examination Board, return the following year to re-sit those examinations which were failed. Normally, during a re-sit year, the student does not attend College, but the Examiners may, at their discretion, invite or require the student to retake the year in attendance. Coursework marks for students who are re-sitting exams only will be carried over from the year in which they took the coursework. Where a student is judged by the Examiners not to be engaged with the course and/or not working hard enough, the Examiners have the option of requiring the student to withdraw from the programme. Students attempting the year for the second time will not normally be considered for condoning of failures. Students failing their second attempt at the year are required to withdraw from the programme.

**Missed Exams**
For non-final years, if a student misses any exams through illness or other reason with mitigating circumstances acceptable to the Board of Examiners, in the case that one or two exams are missed:

- If there was coursework for the course then the coursework mark to be considered in lieu of exam mark
- If there is evidence of learning then the exam is set to ‘Pass’ and the course is removed from the year mark calculation
- In exceptional circumstances, a special assessment may be set and sat at a later date.

Otherwise, if at least three exams are missed, the student is to be invited back to take exams the following summer, and the Board of Examiners should consider whether the student would benefit from attending the whole year again.

In the final year, the College rules are followed for the award of an Honours degree under classified aegrotat provision, or if there has been a significant but insufficient assessment in the final year the student is offered an aegrotat degree. See the College’s academic regulations for BEng/MEng degrees.

**Marking of examinations**
In the Department of Bioengineering we take great care to ensure the marking of examinations is accurate and fair.

You can read the College policy on exam marking at: https://www.imperial.ac.uk/media/imperial-college/administration-and-support-services/registry/academic-governance/public/academic-policy/marketing-and-moderation/Protocol-for-marking-and-moderation.pdf

The Department of Bioengineering uses ‘check marking’ so at least two people have read each script and agreed the mark. Examinations are initially marked by the module lecturer(s). The marked scripts are returned to the Student Office. The scripts are then checked, so a second marker reads each script and confirms the marks awarded are appropriate, and that marks have been correctly summed and logged for the paper. Administrative staff also audit examination mark sheets to ensure there are no errors in the arithmetic and no pages have been missed.

Sample exam scripts and coursework are audited by External Examiners.
**Moderation policy**
Occasionally it is necessary to moderate exam and/or module marks to account for a variety of situations (e.g. an exam that turned out to be too difficult or failed to discriminate between students well near the pass mark). Moderation only takes place on anonymised module marks.

The process of moderation for modules run by the Department of Bioengineering is explained below.

Module examiners mark exams and coursework according to the marking scheme agreed with the External Examiners. If small modifications to the marking scheme are necessary, these can be implemented and are noted at the Examiners’ Progression and Awards Board.

Modules are then reviewed by a moderation panel consisting of at least three of the following: Academic Tutor, Director of Courses, Senior Tutor, Examinations Officer, Director of Postgraduate Studies or their representatives or deputies.

The panel reviews the mean, standard deviation and also the distribution of the module marks. If the panel decides the distribution is unsatisfactory then moderation is considered and the Departmental moderation policy applied. The following moderations are usually considered:

a. If the mean is outside the desired range, the minimal shift to bring it into this range is normally performed
b. If there is a double peak or a long tail, a 'tail uplift' moderation is usually performed
c. If there is a more complex problem (e.g. faulty question part), the panel may consider the effect of using more targeted, question based moderation.

Moderations are discussed with the External Examiners prior to the Examiners’ Progression and Awards Board and again at the Examiners’ Progression and Awards Board itself. This ensures all students are treated fairly and no one is disadvantaged by the process. Finally, at the Board, module leaders are requested to provide an explanation to the Board as to what happened, and present a plan to avoid moderation next year.

**Mitigation policy**
During your degree there may be exceptional times when your attendance, performance, ability to complete and submit work, sit exams or tests or otherwise meet your responsibilities as a student are adversely affected by circumstances beyond your control. Examples of these circumstances are serious illness or death of a close relative.

When genuine mitigating circumstances occur, the Department will do its best to help you deal with the situation, and ensure that you are not penalised for something that is not your fault.

The Department must also be careful to ensure that the circumstances are genuine and sufficiently serious enough to be classified as mitigating circumstances. Any fraudulent claims will be dealt with by the College's disciplinary procedures.

The College therefore has a form for students to request that mitigating circumstances are taken into account, which is available from the College website: https://www.imperial.ac.uk/about/governance/academic-governance/academic-policy/exams-and-assessment/

In most cases students will also be required to submit documentary evidence, such as an official doctor’s note.

If you think you have mitigating circumstances affecting any of the following:

- Attendance at Exams
- Submission of coursework
- Attendance at progress tests, oral tests or any other kind of test whether assessed or non-assessed.
- Any other responsibility as a student that is assessed, affects the assessment of others or may have any impact on marks or qualification.
Inform the Student Office as soon as possible in person or by telephone on +44 (0)20 7594 9296 followed by a confirmation email to m.obrien@imperial.ac.uk or +44 (0)20 7594 5122 followed by a confirmation email to r.pointer@imperial.ac.uk. If possible this should be before the deadline or affected exam.

If you cannot contact the Department because, for example, it is the weekend, email m.obrien@imperial.ac.uk and r.pointer@imperial.ac.uk as soon as possible. Please use your Imperial College email address if possible to ensure your email does not get spam filtered.

Then the following procedure must be followed:

1. Fill in the College form requesting consideration of mitigating circumstances and submit it
2. The form should be submitted to the Student Office, except in the case where confidentiality is essential, in which case it should be submitted to the Senior Tutor or Deputy Senior Tutor, and the Student Office should be notified that it has been submitted
3. Obtain the necessary documentary proof – e.g. if you are ill, a doctor’s note from a professionally recognised doctor. The College Health Centre is the best place for this as they understand that we require their opinion on the likely effects of your illness on your performance.

The complete form together with the documentary proof should be submitted as soon as possible, and within 5 working days of the start of the circumstances.

All cases will be considered by a Departmental Mitigating Circumstances Panel, consisting of the Senior Tutor, Deputy Senior Tutor and Academic Tutor, who meet throughout the term to make a provisional ruling. This is subject to approval by the Examinations Board, which meets at the end of the academic year.

If the circumstances described in the request form are not considered serious enough to be genuine mitigating circumstances or the evidence is not sufficient, then the request will be rejected, and the situation will be treated as it would have been had the request not been made.

For example, if an exam was missed for a reason that was not considered a genuine mitigating circumstance (e.g. student had the wrong day), then the exam would be counted as a fail.

If the request for mitigating circumstances is accepted, the Departmental Mitigation policy is followed:

**In the case that one or two exams are significantly affected, the following potential outcomes apply:**

1. If there is an opportunity to resit the exam without disadvantaging the student, by for example taking a second mastery test as if it were the first attempt, then this is the favoured option
2. If the exam was taken and there is some evidence of learning (from for example coursework) then the mark is set to ‘MP’, Mitigated Pass, which removes the mark from the degree calculations while allowing progression to the next year.

If a student has mitigating circumstances affecting all exams rather than one or two exams specifically identified as being affected, one or two exams may be set to ‘MP’, to take into consideration their overall performance.

Otherwise, if more than two exams are significantly affected or, if overall performance is catastrophic, the student will be invited back to take exams, and the Board of Examiners should consider whether the student would benefit from attending the whole year again.

**In the case that coursework has been missed, the following potential outcomes apply:**

1. The coursework be accepted for full credit, or
2. That a new piece of coursework be submitted with a new deadline for full credit, or
3. The Committee will suggest an appropriate alternative assessment.

Please note that the Board of Examiners will look at patterns of lateness of coursework submission and lecture, tutorial and lab attendance over all terms when deciding which of the above outcomes is applicable.
For Final Year Students

For final year students, College rules are followed for the award of an Honours Degree under classified aegrotat provision, or if there has been a significant but insufficient assessment in the final year the student is offered an aegrotat degree. See the College's academic regulations for BEng/MEng degrees.

(https://www.imperial.ac.uk/about/governance/academic-governance/regulations/)

Assessment of project work

Please see the Project Handbook for details on how the projects are assessed.

Coursework deadlines and academic feedback policy

Types of coursework

During your degree, you will work on various sorts of exercises to be carried out outside the classroom. These will include problem sheets, projects, practical reports and essays. Many modules include some assessed coursework (summative assessment). You may also have coursework to complete which doesn’t contribute to your final mark but is for your learning (formative assessments). It is extremely important that you complete all your coursework, whether formative or summative, as it is set for your learning.

Deadlines for coursework

There are very strict deadlines for the submission of assessed coursework. You should plan your work so that you can complete these assignments in the appropriate time. To help you plan and manage your time, the Department publishes the coursework deadlines for the forthcoming term, and publishes the date by which you can expect to receive feedback. This information is provided at the start of term.

The date and time for coursework submission will be published and it is essential that you submit your coursework by this time. Please be aware that all dates and times are in UK local time and it is your responsibility to ensure these are met. The method by which you submit your coursework will be explained by the relevant module leader.

Definition of late submission

Late submission is defined by the College as: “any piece of assessed work which is submitted beyond the published deadline (date and time)”.

Penalties for late submission

Work submitted up to 24 hours after the assessment deadline will be marked, but the mark will be capped at the pass mark (typically 40% for undergraduate students and 50% for postgraduate students).

Work submitted more than 24 hours after the deadline will not be accepted as a valid attempt and a mark of zero will be recorded. The Department is not obliged to mark (or provide feedback on) work submitted more than 24 hours after the deadline but may do so if it judges the submission to be in a reasonable time and that there are educational benefits. If late work is marked, feedback and marks may be provided outside of the published schedule.

This policy relates to calendar days and so both weekends, weekdays and public holidays are included.

Mitigating Circumstances

This policy on late submission does not apply where a student has been granted an extension as a result of successfully making a claim for mitigated circumstances, but it would apply if a student missed the extended deadline without any subsequent approved further extension.

The full College Policy on Late submission of Assessment can be found online at: https://www.imperial.ac.uk/media/imperial-college/administration-and-support-services/registry/academic-governance/public/academic-policy/marketing-and-moderation/Late-submission-Policy.pdf
**Academic Feedback on Assessment**

**Marks**

Coursework marks will either be returned to you by the responsible lecturer, or will be available from the Student Office, or the College’s Virtual Learning Environment (VLE), Blackboard.

**Issuing of provisional marks**

The Department may release provisional marks for some assessed work prior to ratification by the Board of Examiners. It will be made clear to students in the coursework calendar if provisional marks will be released or not. Where such marks are released, they are provisional and are subject to change by the Board of Examiners.

Provisional marks will not be released for major pieces of work (e.g. dissertations) prior to the meeting of the Board of Examiners.

The College’s full policy on the Issuing of Provisional Marks to Students is available online at: https://www.imperial.ac.uk/media/imperial-college/administration-and-support-services/registry/academic-governance/public/academic-policy/marking-and-moderation/Guidelines-for-issuing-provisional-marks-to-students-on-taught-programmes.pdf

**Feedback formats**

Feedback may be provided in one of a number of formats, including (but not limited to):

- Oral (during or after lectures, personally or as a group feedback session)
- Personal (discussion with academics during office hours, meetings with Personal Tutors)
- Interactive (problem solving tutorials with GTAs & study groups, peer feedback)
- Written (solutions/model answers to coursework, electronic feedback on online quizzes).

**Timing of feedback**

The dates for students to receive feedback on their assessments are indicated in the coursework calendars provided before the start of teaching.

Typically, these deadlines are set for 10 working days (not including weekends, public holidays or College Closure days) after the submission deadline. However, in some circumstances, such as when an assessment is particularly significant and will therefore take a long time to mark, a longer timeframe for feedback may be set. A longer timeframe will also be set for feedback on examinations.

Please refer to the coursework calendar for information on when coursework is due for submission and when you can expect to receive feedback on your work.

**Feedback on exams**

Preliminary exam results will be provided to students as provisional marks. These results are provisional and are subject to change by the Board of Examiners, for example by moderation. Module leaders will produce a short summary of cohort performance in examinations which will be provided to students after the Board of Examinations.

**College policy on exams and religious obligations**

The major examination periods are timed to accommodate the requirements of each individual degree programme and you may therefore find that you have an exam scheduled during a particular religious festival or period of religious observance.

If this is the case you should speak to someone in the Department as soon as possible – usually this would be the Senior Tutor. Your Tutor should listen to your situation and discuss potential solutions with you, although it will not always be possible to find a solution.

You can find out more about exams and religious obligations at: http://www.imperial.ac.uk/student-records-and-data/for-current-students/undergraduate-and-taught-postgraduate/exams-assessments-and-regulations/exams-and-religious-obligations/
You can view the College's Academic and Examination Regulations at:

**Instruction to Candidates for Examinations**

Students who are candidates for examinations are asked to note that all examinations are conducted in accordance with the College's Academic Regulations, the Regulations for Programmes of Study and the Examination Regulations.

Instructions for exam candidates can be found here:

**Plagiarism**

Plagiarism is the presentation of another person's thoughts, words, images or diagrams as though they were your own. Another form of plagiarism is self-plagiarism, which involves using your own prior work without acknowledging its reuse.

Plagiarism is considered a cheating offence and must be avoided, with particular care on coursework, essays, reports and projects written in your own time and also in open and closed book written examinations.

Where plagiarism is detected in group work, members of that group may be deemed to have collective responsibility for the integrity of work submitted by that group and may be liable for any penalty imposed, proportionate to their contribution.

For further information, please refer to the Academic Misconduct Policy and Procedures section in this handbook or the Colleges Plagiarism, Academic Integrity & Exam Offences site:

This information provides you with an overview of plagiarism. Plagiarism is a very serious offence and you need to know what it is, how to avoid it, and what the consequences are. You are strongly advised to read the following information sources to ensure you fully understand the issues:

- [https://www.imperial.ac.uk/admin-services/library/learning-support/plagiarism-awareness/undergraduates/](https://www.imperial.ac.uk/admin-services/library/learning-support/plagiarism-awareness/undergraduates/)

**What is plagiarism?**

Plagiarism is when you use someone else's work, words or ideas and use these in your own work (e.g. coursework, thesis, examination, etc.), and do not acknowledge that you have done this.

Plagiarism is defined by the College as:

“Plagiarism, which is the presentation of another person's thoughts, words or images and diagrams as though they were your own and which is a form of cheating, must be avoided, with particular care in coursework, essays, reports and projects written in your own time and also in open and closed book written examinations.”

**Plagiarism can occur in a number of ways. The six main types of plagiarism include:**

- Collusion
- Cut/copy and paste
• Word switch
• Concealing sources
• Misinterpreting common knowledge
• Self-plagiarism.

It is extremely important you have an awareness of what plagiarism is and how to avoid it.

If you are at all unsure about how to reference or cite your sources there is very useful guidance here: http://www.imperial.ac.uk/admin-services/library/learning-support/reference-management/what-is-referencing/. Or, you can seek help from your tutor or Liaison Librarian: http://www.imperial.ac.uk/admin-services/library/subject-support/bioengineering/.

You should also be aware that there are different styles of referencing. If you are not sure which to use speak to your Module Leader for advice. You can find out about the different referencing styles at http://www.imperial.ac.uk/admin-services/library/learning-support/reference-management/what-is-referencing/.

Why is it a problem?

At Imperial, as in other universities, plagiarism is considered an examination offence, and is often described as cheating. Your lecturers will use a number of methods to detect plagiarism, which may include an electronic detection tool. Some students commit plagiarism when preparing written pieces of work without being aware of it.

It is important that you:

• Know what plagiarism is, and why it is an academic offence
• Are aware that all material you use from online and print sources should be acknowledged properly
• Understand whether assigned group work is to be submitted with individual contributions or as a joint piece of work
• Know that if you re-use parts of your own work, you must acknowledge this (to not do so is self-plagiarism)
• Speak to your lecturers or tutors if you are not sure about the appropriate use and correct acknowledgement of other sources in your own work.

What happens if I commit plagiarism?

• The College will investigate all instances where an examination or assessment offence is reported and apply appropriate penalties to students who are found guilty.
  o These penalties could include:
    ▪ A mark of zero for the assessment in which the examination offence occurred
    ▪ A mark of zero for all the assessments in that year
    ▪ Exclusion from all future examinations of the University (i.e. expulsion from the university)
• Where plagiarism is detected in group work, members of that group may be deemed to have collective responsibility for the integrity for work submitted by that group and may be liable for any penalty imposed.
• More information about the consequences of plagiarism is available in the College’s ‘Cheating Offences Policy and Procedures’.

Key points to remember:

• All work that you submit must be expressed in your own words and incorporate your own ideas and judgements, and where you have used other peoples’ work you must clearly acknowledge and identify your sources
• You must not present another person's work, thoughts, words or images and diagrams as though they were your own, under any circumstances
• Direct quotations from the published or unpublished work of others must always be clearly identified as such by the use of quotation marks. A full reference to their source must be provided in the proper form. This applies to a series of short quotations from several different sources just as much as a single unacknowledged long quotation from a single source.

• There is guidance available on quoting in different referencing styles available:
  o Vancouver: http://www.imperial.ac.uk/admin-services/library/learning-support/reference-management/vancouver-style/citing/

• If you summarise or paraphrase another person's ideas or judgements, figures, diagrams or software, you must refer to that person in your text, and include the work referred to in your bibliography.

• Plagiarism can occur in closed book written examinations. For example, if you have learnt text by heart and simply reproduce this information without attribution. The examiners may regard text reproduced without reference or critical analysis as plagiarism.

• The direct and unacknowledged repetition of your own work which has already been submitted for assessment can constitute self-plagiarism.

• Where group work is submitted, this should be presented and referenced, with individual contributions recorded, in the convention appropriate to your discipline.

• If you become aware that a member or members of the group may have plagiarised part of the group’s submission you have an obligation to report your suspicions to your Personal or Senior Tutor.

• The use of the work of another student, past or present, also constitutes plagiarism. Giving your work to another student to use may also constitute an offence.

• The College may submit your work to an external plagiarism detection service, and by registering with the College you are automatically giving your consent for any of your work to be submitted to such a service. If you have been thorough with your referencing and citations there is absolutely nothing to worry about with regards to this.

Submission for most coursework is through the Turnitin submission system in Blackboard (http://learn.imperial.ac.uk). This is a system that reads the submission and compares it with a very large library of existing material, and also with other submissions of the same piece of coursework. Turnitin is a highly effective tool in identifying attempts at plagiarism.
6. Board of examiners

External Examiners (MEng Biomedical Engineering)

- Professor Anna Barney: University of Southampton
- Dr Amy Zavatsky: University of Oxford
- TBC

External Examiners (all programmes in the Department of Bioengineering)

- Professor Patricia Lawford: University of Sheffield
- Professor John Lowry: National University of Ireland Maynooth
- Professor Barbara Webb: University of Edinburgh
- Professor Alberto Saiani: University of Manchester
- Dr Ben Horrocks: Newcastle University
- Dr Mark Van Rossum: Nottingham University
- Professor Maarten de Vos: University of Oxford
- Dr Gavin Jell: University College London
- Professor Azzam Taktak: University of Liverpool

External examining acts as an essential part of the College’s quality assurance and enhancement process, serving to ensure that academic standards are maintained. The knowledgeable and independent views of external examiners are invaluable in certifying that the College’s awards are appropriate and comparable, as well as highlighting good practice and potential areas of enhancement.

It is inappropriate for you to submit complaints or representations direct to external examiners or to seek to influence your external examiners. Inappropriate communication towards an examiner would make you liable for disciplinary action.

A summary of External examiners reports from the previous academic year can be found here:

7. Location and facilities

Imperial has a number of campuses in London and the South East. All have excellent travel links and are easily accessible via public transport.

Your main location of study will be:

📍 South Kensington

Exhibition Road, SW7 2AZ

Shuttle bus

A free shuttle bus runs between our South Kensington, White City and Hammersmith Campuses on weekdays. Seats are available on a first-come, first-served basis. You need to show your College ID card to board. Download the timetable at:

💻 [www.imperial.ac.uk/estates-facilities/travel/shuttle-bus](http://www.imperial.ac.uk/estates-facilities/travel/shuttle-bus)

Maps

Campus maps and travel directions are available at:

💻 [www.imperial.ac.uk/visit/campuses](http://www.imperial.ac.uk/visit/campuses)

Accessibility

Information about the accessibility of our South Kensington Campus is available online through the DisabledGo access guides:

💻 [www.disabledgo.com/organisations/imperial-college-london-2](http://www.disabledgo.com/organisations/imperial-college-london-2)

Smoke-Free Policy

All Imperial campuses and properties are smoke-free. This means that smoking by staff and students is not permitted on or within 20 metres of College land. The policy covers all College properties, including student accommodation and sports grounds.

💻 [www.imperial.ac.uk/smoke-free](http://www.imperial.ac.uk/smoke-free)

Facilities

Café and refreshments

The nearest café to the Department is located on Level 3 of the Royal School of Mines. The College Café, located off Dalby Court, is also nearby.

Accessing the Department

Your ID card will give you access to the Department and laboratories (where appropriate/requested).

In the interests of safety and security, please:

- Do not prop doors open
- Be aware of tailgating (someone following you through an access-restricted area.)
You may work in the Department only between specified times, as detailed below. If you need to
arrange other access please speak to your supervisor, tutor or the Student Office. College Security is
very strict about this and comes down heavily on students and staff who do not comply. If you have
any problems with your ID card, please contact staff at the Student Office (RSM 3.21c).

Access times for different users in the Department of Bioengineering:

<table>
<thead>
<tr>
<th>ID card group</th>
<th>Times</th>
<th>Days</th>
</tr>
</thead>
<tbody>
<tr>
<td>Staff</td>
<td>07:00-23:59</td>
<td>7 days a week</td>
</tr>
<tr>
<td>PhD</td>
<td>07:00-23:59</td>
<td>7 days a week</td>
</tr>
<tr>
<td>MSc, MRes</td>
<td>08:00-18:30</td>
<td>5 days a week</td>
</tr>
<tr>
<td>UG</td>
<td>08:00-18:30</td>
<td>5 days a week</td>
</tr>
</tbody>
</table>

At some stage during your time in the Department, it may be necessary for you to gain access to
some restricted areas, e.g. certain laboratories. If this is the case, you will need to follow these steps:

1. Get permission from your supervisor and the lab lead PI
2. Ensure the relevant safety assessments are completed, including a risk assessment of work
to be carried out
3. Ensure the induction is carried out and the form completed (see Link to Swipe access
information: http://www.imperial.ac.uk/bioengineering/admin/info/swipe/ for more information)
4. Complete the online access request (including the uploading of the completed induction
form).

Computer access and printing is available in the Student Common Room (3.06 RSM). Students can
also use G.08 on the ground floor of RSM. The Department’s undergraduate office is located in 3.21
Level 3, Royal School of Mines and during term time is open Monday-Friday 0830-1100 and 1230-
1500.

Printing

The Department has black/white and colour photocopiers in the utility areas on Levels 3 and 4 and in
RSM 3.06, which are accessed using your ID card. These can also be used as printers and scanners
via the ICT print service – check http://www.imperial.ac.uk/ict/printservice for information on using this
service. An additional colour (ICT) copier/printer is available in RSM 3.38.

If you have problems with these machines or your swipe card, please contact ICT - do not try to
correct problems yourself. All student groups/years will receive an initial print credit on their account.
Please try to use Departmental printers for your printing where possible, as opposed to those in other
areas of the College.

Virtual Learning Environment (VLE): Blackboard

The Department makes use of the ‘Blackboard’ virtual learning environment - a web-based system
hosted by ICT. You can login to Blackboard from the following link: https://bb.imperial.ac.uk/

Lecture notes and problem sheets can be found on Blackboard by navigating to the appropriate
module using the links provided, and some modules will use it for more advanced purposes, such as
self-tests and assessed coursework tests.

If you have any problems accessing Blackboard, try trouble shooting this first:
   • Check if your computer allows Java pop ups
   • Try using Firefox browser if you used IE before.

We strongly advise students to report any technical problems to ICT when submitting assignments so
that they can keep a record and help you swiftly. You can contact ICT from an internal phone on
extension number 49000, or from any other phone on 0207 59 49000. Alternatively you can raise an issue via the ASK ICT service (https://imperial.service-now.com/ict).

**Panopto**
Panopto is a College ICT service that allows the recording of a computer screen, in addition to audio and visual content. The Department aims to record as many lectures as possible. Most of the lectures that take place in the lecture theatres RSM 147 and RSM 228 are recorded and linked to the appropriate module page on Blackboard. Lectures outside of these rooms may not be recorded due to unavailability of equipment. If you cannot access a recording, please speak to the Student Office.

To watch lecture recordings, go to the respective module page on Blackboard (https://bb.imperial.ac.uk) and find the link called ‘Lecture Recordings’ in the left-hand menu. You will be prompted to log in once you click on the link.

You can find out more about Panopto and lecture recordings at: http://www.imperial.ac.uk/admin-services/ict/self-service/teaching-learning/elearning-services/panopto/students-use/.

Before using Panopto, please ensure you have read the College’s guidelines on audio and video lecture recording: https://www.imperial.ac.uk/media/imperial-college/whats-on/public/Audioandvideolectrerrecordingguidelines.pdf.
8. **Departmental life and extracurricular activities**

We believe that the Department of Bioengineering is a welcoming and lively place to be. There are lots of events happening throughout the year and we really encourage you to get involved with Departmental life and make the most of the opportunities available to you, whether you are a first year, a final year or a postgraduate student.

There are also many opportunities available to you as a student of Imperial College London. There are numerous talks, seminar series, student clubs, summer school and volunteering opportunities for you to participate in and enjoy. Find out more on the website at: [https://www.imperial.ac.uk/students/](https://www.imperial.ac.uk/students/)

**Seminar programme**

The Department of Bioengineering hosts a seminar programme on Wednesdays at 4pm, with guest speakers from other institutions talking about a range of academic topics relevant to Bioengineering. Find out more, including upcoming dates, on the Events page of the website: [http://www.imperial.ac.uk/bioengineering/whats-on/events/](http://www.imperial.ac.uk/bioengineering/whats-on/events/)

**Outreach**

The Department of Bioengineering hosts and participates in many outreach and public engagement events. For more information, or to find out about getting involved, you can:

- Contact the Admissions and Outreach Manager Lorna Stevenson (lorna.stevenson@imperial.ac.uk)

**Prizes and awards in the Department**

There are many prizes and awards received each year by students in the Department of Bioengineering. These can be specifically for undergraduates, postgraduates or for any students in the Department. Some are run by the Department and others are College-level awards. You can find out more about these awards and prizes, including background information and eligibility, on the website at: [http://www.imperial.ac.uk/bioengineering/admin/current-uq/prizes/](http://www.imperial.ac.uk/bioengineering/admin/current-uq/prizes/)

**The Royal Academy’s Engineering Leadership Standard Awards’ Scheme**

As a student of the Department of Bioengineering you are invited to register as a member of the Royal Academy's Engineering Leadership Standard Awards’ Scheme. This scheme is open to all British engineering undergraduates for the duration of their studies and is meant to develop career interest and skills in engineering. A registration deadline may apply, so check the website for more details: [http://www.raeng.org.uk/grants-and-prizes/schemes-for-students](http://www.raeng.org.uk/grants-and-prizes/schemes-for-students)

**Imperial College Union Bioengineering Society**

The Imperial College Union Bioengineering Society is a constituent society of the Imperial College Union, under the wing of the City and Guilds College Union (CGCU). Started 13 years ago by a group of enthusiastic MSc students, the ICU Bioengineering Society has been run, since its inception, with the aim of broadening the experiences of Bioengineering students beyond that of the curriculum. All undergraduate and postgraduate students enrolled in the Department of Bioengineering are automatically a part of the Bioengineering Society.

Find out more by looking at the Society's website: [https://www.union.ic.ac.uk/guilds/bioeng/](https://www.union.ic.ac.uk/guilds/bioeng/)

**Imperial College Union-Engineering Students’ Association**

The IC Engineering Students’ Association has the following objectives:

- To aid the academic, welfare, sporting and social interests of members of the faculty
- To encourage, promote and support clubs and societies
- To represent the needs and interests of members to the College, ICU and external bodies.

Find out more by looking at the Association’s website: [https://cgcu.net/](https://cgcu.net/)
Engineers Without Borders Society (EWB-UK)

Engineers Without Borders Society (EWB-UK) is a student-led charity aiming to facilitate human development through engineering. If you wish to find out more please visit the website at: http://www.ewb-uk.org/

Other activities

There is a very wide range of non-academic activities available and we recommend that you participate in these activities to gain a wider experience of the life here at Imperial and in London, and in many cases you can pick up skills that employers value.

Fresher's Fair in Week 1 gives you the opportunity to see what is available and introduce yourself to the organizers of those activities. Find out more on the website at: http://www.imperial.ac.uk/students/new-students/welcome-week/
9. Placements

The College defines a placement as:

“… work experience, assessed project work, a period of course-based study or a period of research (for which academic credit is awarded and/or where the student remains subject to College student regulations during the relevant period) and where there is a transfer of direct supervision of the student to a third party (i.e. where a member of staff at the third party acts as the day-to-day supervisor/manager) for a period of two weeks or more.”

Academic departments are responsible for managing any study or work placement which forms part of your degree programme. It is expected that you will contribute to the process of planning your placement.

For guidance on this, see the College’s Placement and Learning Policy and associated good practice:

[www.imperial.ac.uk/about/governance/academic-governance/academic-policy/placement-learning](http://www.imperial.ac.uk/about/governance/academic-governance/academic-policy/placement-learning)

Your Departmental Placement Manager:

- Mr Robert Ferguson
- Telephone: 020 7594 6371
- Email: robert.ferguson@imperial.ac.uk

For more information on placements visit the Placements website:

[www.imperial.ac.uk/placements](http://www.imperial.ac.uk/placements)

If you are considering/planning a placement outside the UK you should also refer to the Placement Abroad Handbook:

[www.imperial.ac.uk/placements/information-for-imperial-college-students](http://www.imperial.ac.uk/placements/information-for-imperial-college-students)
10. Undergraduate Research Opportunities Programme

What is UROP?

UROP is Imperial College’s hugely active Undergraduate Research Opportunities Programme for students who wish to develop an appreciation of research and the environment within which it takes place.

A UROP placement is a research experience based at Imperial, supervised by a member of academic staff. The placement can take many formats depending on what the student and their supervisor agree to pursue. It will depend on the interests of the student, the opportunities that exist at the time in the particular research group/area and the professional guidance of the academic supervisor. The vast majority of UROPs will be led by the academic, although for some students it provides an opportunity to lead on an idea with support and guidance from the academic.

Usually UROPs take place for 6-10 weeks over the summer vacation period, although arrangements are made locally between supervisors and students.

Benefits of UROP

UROPs provide undergraduate students with experience of academic research, which can be a stepping stone to careers in the academic environment (or, alternatively, it may be a way for students to find out that they would not want to pursue an academic career).

UROPs are also a good way to gain new skills which may be immediately useful, or useful in the future. UROPs can also be valuable for building CVs and demonstrating skills to future employers.

Funding

A UROP research experience is not paid employment. You could undertake a UROP placement without funding, although naturally this would not be possible for everyone.

There are also several opportunities to secure funding for your UROP. The College operates a UROP bursaries scheme, which you can find out more about on the website. There are several third-party schemes to which you might be able to apply, and sometimes supervisors are also able to help students in finding funding to cover their living costs. There is a lot of information about funding your UROP on the College website at:

http://www.imperial.ac.uk/urop/how-to-get-involved/funding/

How do I secure a project?

You could approach a potential supervisor directly to discuss opportunities, or you could look at the list of opportunities on the UROP website (http://www.imperial.ac.uk/urop/how-to-get-involved/academic-entries-adverts/)

Where can I find out more?

The College provides very comprehensive information about UROP placements on the website at:

http://www.imperial.ac.uk/urop/
11. Undergraduate Teaching Assistants

Undergraduates who assist with teaching are called Undergraduate Teaching Assistants (UTAs). UTAs complement the activities of Graduate Teaching Assistants and staff by assisting undergraduate students in more junior years with their learning. UTAs only teach students in years junior to themselves and do not have any responsibility for setting or conducting assessments.

Being a UTA has several advantages – it is an opportunity to gain valuable experience and skills for personal and career development, and it provides an insight into other aspects of academia. It is also paid work (the number of hours worked each week by a UTA will be limited in accordance with their main academic responsibilities).

Being taught by UTAs also has advantages – they have very recently completed the modules which they are helping to teach and so they have a good understanding of the challenges of the module and how these might be overcome. They can also be inspirational and encourage high aspiration and more independent learning amongst students.

In your first years of study, you won’t be able to be a UTA, but you may come across colleagues from more senior years who are, and it may be something you wish to pursue in the future.

12. Working while studying

If you are studying full-time, the College recommends that you do not work part-time during term time. If this is unavoidable we advise you to work no more than 10–15 hours per week, which should be principally at weekends and not within normal College working hours.

Working in excess of these hours could impact adversely on your studies or health.

If you are here on a Tier 4 visa you can work no more than 20 hours a week during term time. Some sponsors may not permit you to take up work outside your studies and others may specify a limit.

If you are considering part-time work during term time you are strongly advised to discuss this issue with your Personal Tutor. If you are on a Tier 4 visa you should also seek advice from the International Student Support team regarding visa limitations on employment.

13. Bursaries and Scholarships

The College has a lot of resources available to help you find bursaries and scholarships to support your studies here. For example, the College runs the Imperial Bursary scheme and the President’s Undergraduate Scholarship scheme.

A search tool is also provided to enable you to find out more about other available scholarships. You can find out more about these schemes and tools on the website at: http://www.imperial.ac.uk/study/ug/fees-and-funding/bursaries-and-scholarships/

The College also provides a list of funding opportunities from external organisations, for information. This list can be accessed online at: http://www.imperial.ac.uk/study/ug/fees-and-funding/bursaries-and-scholarships/external-awards/
14. Health and safety

The College Safety Department

The Safety Department offers a range of specialist advice on all aspects of safety. This includes anything which you feel might affect you directly, or which may be associated with teaching, research or support service activities.

The College’s activities range from the use of hazardous materials (biological, chemical and radiological substances) to field work, heavy or awkward lifting, driving and working alone or late.

All College activities are covered by general health and safety regulations, but higher risk activities will have additional requirements.

The Safety Department helps departments and individuals ensure effective safety management systems are in place throughout the College to comply with specific legal requirements.

Sometimes the management systems fail, and an accident or a near-miss incident arises; it is important that we learn lessons from such situations to prevent recurrence and the Safety Department can support such investigations. All accidents and incidents should be reported online at:

[www.imperial.ac.uk/safety](http://www.imperial.ac.uk/safety)

To report concerns or to ask for advice you should contact your programme director, academic supervisor or departmental safety officer in the first instance. You may also contact the Safety Department directly.

Occupational Health requirements

The College Occupational Health Service provides services to:

- protect health at work
- assess and advise on fitness for work
- ensure that health issues are effectively managed.

The Service promotes and supports a culture where the physical and psychological health of staff, students and others involved in the College is respected, protected and improved whilst at work.

[www.imperial.ac.uk/occupational-health](http://www.imperial.ac.uk/occupational-health)

The College’s Health and Safety Statement can be found at:

The Department of Bioengineering considers the health and safety of staff, students, contractors and visitors to be of paramount importance.

We expect staff, students, contractors and visitors to share our commitment to safety by complying with our policies and procedures and to understand that they too have legal and moral obligations to themselves and to one another.

You are responsible for looking after your own health and safety and that of others affected by your College-related work and leisure activities. You must:

- Comply with all local and College policies, procedures and codes of practice and with the arrangements which the College has in place to control health and safety risks.
• Ensure that your activities do not present unnecessary or uncontrolled risks to yourself or to others
• Attend appropriate induction and training
• Report any accidents, unsafe circumstances or work-related ill health of which you become aware to the appropriate person
• Not interfere with any equipment provided for Health and Safety
• Inform your supervisor or the person in charge of the activity in cases where you are not confident that you are competent to carry out a work or leisure activity safely, rather than compromise your own safety or the safety of others.

The Department will provide, manage and maintain a work environment which is, so far as is reasonably practicable, safe and where risks to health are controlled.

The Department and College will offer training to all staff and students in safe methods of working and will foster responsible attitudes to health and safety. Specific methods of research and the safety of this is the responsibility of the Principle investigator.

As a student, you must not work alone and unsupervised, nor out of hours.

Your Departmental Safety Manager is:

Ken Keating (k.keating@imperial.ac.uk)
Room C01 – Bessemer building level 2
Telephone +44 (0) 20 7594 5170, 07590250478

All major health and safety decisions are made by the Departmental Safety Committee, which meets termly. Information about health and safety can be found on the College website at http://www3.imperial.ac.uk/safety

Further safety specific information regarding the departmental processes and procedures can be found at the departmental website: https://www.imperial.ac.uk/bioengineering/. (Internal > health and safety) It is essential that you ensure to familiarise yourself with these sites.

Emergency procedures

Security and safety are closely linked. Please help us keep the building secure and safe by following the following simple rules:

• Always wear your College Security/ID card whilst at College. Neck lanyards (red for students, blue for staff) are available from Security or the Student Office

• Do not allow strangers in the building, particularly out of hours

• Never lend your ID card to anybody; if they cause damage or present a risk to security or safety, you will be liable.

In an emergency, dial extension 4444 from any internal phone or 020 7589 1000. This line is supported 24 hours a day. State your exact location, your name and extension number. Security Control will immediately mobilise the required emergency services. Do not ring 999 – Security will coordinate this to ensure that the emergency services gain site access.

🔥 If you discover a fire, immediately press the nearest red alarm call point. Warn people in the vicinity. Evacuate the building and be ready to tell Security and Fire Officers where the fire is. Do not
attempt to tackle fires, chemical spillages or intruders yourself. More information about fire safety is available on the Fire Safety website: http://www.imperial.ac.uk/estates-facilities/health-and-safety/fire-safety/

**Fire alarms**
The emergency evacuation alarm is a continuous siren in the building. Leave the building immediately by means of the stairways – do not use lifts. Do not attempt to tackle fires, chemical spillages or intruders yourself.

**Building evacuation**
Familiarise yourself with the various evacuation routes and use the nearest staircase - see the maps at the end of the safety section in this handbook. Do not always head for the main staircase in the RSM regardless of where you are as this gets very congested. There is fire evacuation signage throughout the building identified by a white arrow on a green background and sometimes a “running man”.

From the main RSM staircase the fire exit is onto Prince Consort Road. The assembly point is towards the junction of Prince Consort Road and Exhibition Road. For the other evacuation routes you should follow the signs down to the lower ground floor and then out onto the RSM courtyard at the rear of the building. The assembly point for these exits is by the Queens Tower.

In the event of a fire alarm all doors are automatically released from swipe card control and you will be able to access the corridors to the other stairwells. If the doors are not released automatically, press the green emergency exit button.

Leave the building quickly. Never use the lifts. Do not return to collect personal belongings.

**PEEPS:** to arrange a Personal Emergency Egress Plan please see the college guidance and contact the Departmental Safety manager.

**First aid**
Local emergency help is provided by qualified first-aiders – see the departmental website for a list of who these people are in the Department. If no local help is available, ring Security on extension 4444 from an internal phone or +44 (0)20 7589 1000.
Evacuation routes
Safety Induction
There will be a safety induction lecture during the first week of term - you are required to attend and a register will be taken.

Laboratories and Workshops
Undergraduates and MSc students may not use laboratory or workshop equipment without permission and until training has been given. All local rules must be adhered to at all times.

Please note:
- You will not be given access to the labs until you have completed the necessary safety procedures, training and inductions - therefore do this promptly when you are asked.
- Departmental technical staff are here to assist you in your project, however please be aware that these are busy roles with many people to help so please plan in advance and make arrangements in plenty of time to avoid disappointment.

Practical Classes
For each practical class, an agreed risk assessment has been completed before commencement of each class. The objective is to ensure that all such classes are conducted in a safe manner, where exposure to any hazard is eliminated or minimised as far as is practicable. All relevant safety information will be provided in the instructions and protocols issued for each class.

Accidents and Near Misses
All accidents, dangerous occurrences or near misses must be reported to the academic member of staff giving the lecture/tutorial or supervising the practical class. It is then essential that a SALUS report is filed to allow this to be logged and any potential lessons to be learned, or improvement/fixes to be made to help prevent future occurrences.

It is appreciated that mistakes happen and that we can all make them from time to time. The department fosters a strict no blame culture and would like all occurrences to be reported on SALUS in order for us to ensure the safety of each researcher, staff member and student within it. We are all responsible for safety.
# First Aiders

Department of Bioengineering

For Emergency Medical Assistance

9am to 5pm Monday to Friday

15. Regulations for Students
All registered students of the College are subject to the Regulations for Students, the College Academic and Examination Regulations and such other regulations that the College may approve from time to time.

www.imperial.ac.uk/about/governance/academic-governance/regulations
www.imperial.ac.uk/students/terms-and-conditions

16. Academic Feedback Policy
We are committed to providing you with timely and appropriate feedback on your academic progress and achievement, enabling you to reflect on your academic progress. During your study you will receive different methods of feedback according to assessment type, discipline, level of study and your individual need. Further guidance on the Policy of Academic Feedback can be found on the Academic Governance website:

www.imperial.ac.uk/media/imperial-college/administration-and-support-services/registry/academic-governance/public/academic-policy/academic-feedback/Academic-feedback-policy-for-taught-programmes.pdf

17. Provisional Marks Guidance
Provisional marks are agreed marks that have yet to be ratified by the Board of Examiners. These results are provisional and are subject to change by the Board of Examiners. The release of provisional marks is permitted except in certain circumstances. Further information can be found in the Guidelines for Issuing Provisional Marks to Students on Taught Programmes:

18. Late Submission Policy
You are responsible for ensuring that you submit your coursework assessments on time and by the published deadline. Any piece of assessed work which is submitted beyond the published deadline (date and time) would be classed as a late submission. Further guidance on Late Submission of Assessments can be found on the Academic Governance website:

www.imperial.ac.uk/media/imperial-college/administration-and-support-services/registry/academic-governance/public/academic-policy/marking-and-moderation/Late-submission-Policy.pdf

19. Academic Integrity
You are expected to conduct all aspects of your academic life in a professional manner. A full explanation of academic integrity, including information on the College's approach to plagiarism is available on the College website:

20. Academic Misconduct Policy and Procedures
It is important that you learn how to properly attribute and acknowledge the work, data and ideas of others. Plagiarism is scientific misconduct, and students whose assessments can be shown to contain plagiarism are subject to penalties as outlined in the College’s Misconduct Policy and Procedures.

www.imperial.ac.uk/about/governance/academic-governance/academic-policy/complaints-appeals-and-discipline
21. Appeal and Complaints Procedures
We have rigorous regulations in place to ensure assessments are conducted with fairness and consistency. In the event that you believe that you have grounds for complaint about academic or administrative services, or wish to appeal the outcome of an assessment or final degree, we have laid out clear and consistent procedures through which complaints and appeals can be investigated and considered:

www.imperial.ac.uk/about/governance/academic-governance/academic-policy/complaints-appeals-and-discipline

22. Student Disciplinary Procedure
The College has the right to investigate any allegation of misconduct against a student and may take disciplinary action where it decides, on the balance of probabilities, that a breach of discipline has been committed. The general principles of the Student Disciplinary Procedure are available on the College website:

www.imperial.ac.uk/admin-services/secretariat/college-governance/charters/ordinances/students/

23. Intellectual Property Rights Policy
For further guidance on the College’s Intellectual Property Rights Policy is available on the College website:

www.imperial.ac.uk/students/enterprising-students/intellectual-property/

You should take special note that any research conversation with current or prospective research supervisor(s) and other group members should be kept confidential.

24. Use of IT Facilities
View the Conditions of Use of IT Facilities:

www.imperial.ac.uk/admin-services/ict/self-service/computers-printing/staff-computers/conditions-of-use-for-it-facilities/

25. Animal research
Understanding the basic biology of infections, injuries and chronic diseases is an essential step in finding new treatments and cures. From cancer to malaria and war wounds to heart disease, research using animals forms an important element of Imperial's work.

The College believes that the use of animals in research is vital to improve human and animal health and welfare. Animals may only be used in research programmes where their use is shown to be necessary for developing new treatments and making medical advances.

Imperial is committed to ensuring that, in cases where this research is deemed essential, all animals in the College’s care are treated with full respect, and that all staff and students involved with this work show due consideration at every level.

For more information please see:

www.imperial.ac.uk/research-and-innovation/about-imperial-research/research-integrity/animal-research
26. Well-being and advice

Student Space
The Student Space website is the central point for information on health and well-being.

www.imperial.ac.uk/student-space

Work-life balance
The pace and intensity of study at Imperial can be demanding so it’s important to find time for outside interests.

Support in your Department
Your Department has a system of academic and pastoral care in place to make sure you have access to the appropriate support throughout your time here. This includes:

Personal Tutor
Your Personal Tutor is your first point of contact for pastoral support and advice. You can arrange to have a meeting with them at any time during your studies (although most Personal Tutors will have set office hours or may require you to make an appointment). What you discuss will be completely confidential. If necessary they will direct you to an appropriate source of support. Your Personal Tutor is usually a member of academic staff who is allocated to you for the duration of your programme to offer help and support with academic or personal issues. They will also follow your progress throughout the course to help keep you on track to succeed.

Your Personal Tutor will meet with you in groups of three or four in alternate weeks during the first year, and periodically during the second, third and fourth years. The attendance of Personal Tutorials (time-tabled in first year) is compulsory. These are occasions where you can raise any areas of difficulty but these sessions will also be programmed to help you develop learning strategies.

Academic staff in the Department of Bioengineering are very active, internationally known researchers. However, this may mean that they are not always in their offices, and so email is an excellent way to arrange appointments and to consult them on minor issues. In the event that the
problem is not resolved via this route, you may also want to consult the Senior Tutor, Deputy Senior Tutor or Director of Courses.

Additionally, as Bioengineering is a highly multi-disciplinary subject, your Personal Tutor may not always be able to answer all technical questions on modules outside their specialism, but they will happily put you in contact with someone who can - such as the appropriate lecturer or Module Leader.

Other members of the academic staff will generally make themselves available to discuss aspects of the module with which they are concerned. Please e-mail them to make an appointment.

Remember – your Personal Tutorials are timetabled and the attendance of them is compulsory.

**Mums and Dads scheme**

Imperial College Union’s ‘Mums and Dads’ scheme matches first years with returning students in the Department to help you tap into the experience and peer support available from existing students.

https://www.imperialcollegeunion.org/your-union/mums-dads-2018

**Support in your hall of residence**

If you’re staying in College accommodation you will have access to a range of support within your hall.

**Well-being support**

All halls have their own Residential Support team who are on call 24/7 to look after your well-being and maintain a friendly living environment so that all residents can study, sleep, relax and enjoy themselves. They also play an important part in the social life of the hall, organising a rolling programme of events to bring everyone together. This is supported by the Hall Activities Fund, which all residents contribute to at a rate of £2/week (in 2018/19).

The team includes a number of returning students, known as Hall Seniors, who can offer first-hand advice on making the most of life at Imperial.

**Administrative support**

Each hall has a Hall Supervisor or a Reception team who oversee the day-to-day running of the residence. So if you have any enquiries or want to report a maintenance issue there are people on hand to help you.
27. Imperial College Union

The Union’s range of 375+ student-led clubs, societies and projects is one of the largest of any UK university, opening up lots of ways for you to enjoy your downtime.

www.imperialcollegeunion.org/about-us

Physical Activity and Sport

Imperial College has a wide range of sports and activities on offer that cater for all standards and abilities. We have a recreational activity offer, competitive sports teams and an elite sport programme. We are dedicated to ensuring we have a diverse, inclusive and exciting offer for all.

For an annual fee of £30 you will get free use of the gym and swimming facilities on our campuses.

www.imperial.ac.uk/sport

Imperial College Union support

All Imperial students automatically become members of Imperial College Union when they register at the College. The Union provides a range of support:

Imperial College Union (ICU) Advice Centre

Imperial College Union runs the Advice Centre independently of the College with advisers on hand to provide free, confidential, independent advice on a wide range of welfare issues including housing, money and debt, employment and consumer rights, and personal safety.

www.imperialcollegeunion.org/advice

Student representatives

The Union have many different opportunities for student representatives to get involved with issues they care about, including Liberation Officers ensuring views of under-represented and interest groups are heard, Academic Reps and Well-being Reps.

If you have any feedback about issues in your department relating to academic or well-being issues you can speak to one of your student representatives.

https://www.imperialcollegeunion.org/your-union/your-representatives/a-to-z

Officer Trustees

The Union is led by a team of Officer Trustees who are elected every year by the students of Imperial College. They take a year out of their studies and work full-time at the Union, representing the voices of students in the Union, the College and the wider community.

The Officer Trustees represent students in a variety of roles, including Education, Welfare, Finance & Service and Clubs & Societies. These elected students are here to represent your views as a student body do make sure you get in touch with them if there’s something you would like to discuss or change.
28. Health and well-being services

NHS Health Centre and finding a doctor

Even if you’re fit and healthy we recommend that you register with a local doctor (GP) as soon as you arrive in London. For help finding your nearest GP see the Student Space website:

www.imperial.ac.uk/student-space/here-for-you/find-a-doctor

There is the Imperial College Health Centre on our South Kensington Campus which you may visit during clinic hours if you’re feeling unwell. Students living within the practice catchment area are encouraged to register with the Centre.

www.imperialcollegehealthcentre.co.uk

NHS Dentist (based in the Imperial College Health Centre)

Imperial College Dental Centre offers a full range of NHS and private treatment options.

www.imperial.ac.uk/student-space/here-for-you/dentist

Counselling and Mental Health

The Student Counselling and Mental Health Advice Service offers short-term counselling to all registered students. The service is free and confidential. Counsellors are available at the South Kensington, Hammersmith and Silwood Park Campuses.

www.imperial.ac.uk/counselling

Financial well-being

If you’ve got any questions about student financial support (loans, scholarships and research council studentships, US and Canadian loans) then contact the Student Financial Support team:

020 7594 9014
student.funding@imperial.ac.uk

If you suddenly find yourself in financial difficulties or experience an unexpected change in circumstances, you may be eligible to apply for emergency financial help through the Student Support Fund. The Fund offers a one-off payment of up to £2,000 to cover such emergencies as last minute accommodation and travel necessities, equipment and childcare. It does not have to be repaid.

www.imperial.ac.uk/students/fees-and-funding/financial-assistance/student-support-fund/

For tuition fees queries, contact the Tuition Fees team:

020 7594 8011
tuition.fees@imperial.ac.uk
29. Support for disabled students

Disability Advisory Service

The Disability Advisory Service provides confidential advice and support for all disabled students and students with specific learning difficulties.

If you think you may have dyslexia or another specific learning difficulty but have never been formally assessed, the Disability Advisory Service offers initial screening appointments.

Room 566, Level 5, Sherfield Building, South Kensington Campus

020 7594 9755

disabilities@imperial.ac.uk

www.imperial.ac.uk/disability-advisory-service

Departmental Disability Officers

Departmental Disability Officers are the first point of contact within your department. They can apply for additional exam arrangements on your behalf, and will facilitate support within your Department.

Ms Louise O’Sullivan is the Departmental Disability Officer in Bioengineering.

(Tel: +44 (0)20 7594 9660, bg-ddo@imperial.ac.uk).

Ms Louise O’Sullivan is your first point of contact within your department and is there to help you with arranging any support within the department that you need. She is also the person who will apply for Special Examination arrangements on your behalf. You need to contact her without delay if you think that you may need extra time or other adjustments for your examinations.

More information on Departmental Disability Officers is available at:

www.imperial.ac.uk/disability-advisory-service/support/ddos

More information on procedures for the consideration of additional exam arrangements in respect of disability is available at:

At Imperial College London we recognise that studying at university can be a challenge, especially if you have a disability. We are keen that you have every opportunity to fulfil your potential and graduate with the degree you deserve. Therefore, it is important that you let us know about any disability, specific learning difficulty or health problem as soon as possible so that we can give expert advice and support to enable you to do this. This service is strictly confidential between you and the relevant College personnel and support services.

Some people never think of themselves as having a disability, but students who have experienced any of the issues listed below have found that a little extra help and support has made all the difference to their study experience.

- Specific learning difficulties (such as dyslexia, dyspraxia, AD[H]D)
- Autistic spectrum disorder (such as Asperger’s)
- Deafness or hearing difficulties
- Long term mental health difficulties (such as chronic anxiety, bipolar disorder, depression)
- Medical conditions (such as epilepsy, arthritis, diabetes, Crohn’s disease)
- Physical disabilities or mobility impairments
- Visual difficulties
You can find further information about special examination arrangements on the website:  

**Disability Advisory Service**

The Disability Advisory Service works with individual students no matter what their disability to ensure that they have the support they need. We can also help if you think that you may have an unrecognised study problem such as dyslexia. Our service is both confidential (information about you is only passed on to other people in the university with your agreement) and individual in that any support is tailored to what you need.

Some of the sorts of things we can help with are:

- Being an advocate on your behalf with others in the College such as your departmental liaison officer, Senior Tutor or exams officer, the accommodation office or the estates department
- Checking that your evidence of disability is appropriate and up-to-date
- Arranging a diagnostic assessment for specific learning difficulties
- Help with applying to the College for the cost of an assessment
- Help with your application for the Disabled Students Allowance (DSA) (see below)
- Helping students not eligible for the Disabled Students Allowance in obtaining support from other sources
- Help with arranging extra Library support
- Supporting applications for continuing accommodation for your second or later years.

You can find about more about the Disability Advisory Service on the website at:  
http://www3.imperial.ac.uk/disabilityadvisoryservice

**Disabled Students Allowance:**

All home students who are UK residents, pay home fees and who have a disability are eligible to apply for a grant called the Disabled Students Allowance, which can pay any extra costs that are a direct result of disability. This fund is not means-tested and is also a grant not a loan, so you will not be expected to pay it back. Remember students with unseen disabilities such as mental health difficulties, learning difficulties or long term health problems are also eligible.
30. Support for international students

English language support
The Centre for Academic English provides free in-sessional English courses for international students while they are studying. These include classes and workshops on academic language, social language, the four skills of reading, writing, listening and speaking, one-to-one consultations with a tutor to work on a piece of academic writing or an oral presentation, self-study resources in the VLE Blackboard, and the Conversation Project, which partners students with a native-speaker volunteer to practise social and conversational English.

www.imperial.ac.uk/academic-english

International Student Support team
Students from outside the UK make up around half of our student population, so our International Student Support team offers year-round support to help our international students settle into Imperial life. This includes UK visa and immigration advice and trips to different places of interest.

www.imperial.ac.uk/study/international-students

Visas
It is very important that you comply with all of the conditions of your visa.

If you need help or advice about visas and your visa conditions please contact the International Student Support team: https://www.imperial.ac.uk/study/international-students/visas-and-immigration/

Whilst in the UK on a student visa, you are required to comply with all of the conditions of your visa. This means that you must be engaged in full-time study for the duration of your visa. You should therefore be aware that if you need to take time out from your programme for any reason (e.g. an interruption of studies), you may be in breach of your visa conditions, unless you return home.

In addition, you should note that the UKVI require the College to monitor attendance for overseas students. Any student not in attendance at the College (e.g. missing meetings with their supervisor and/or group, etc.) will be reported to the UKVI via the College Registry. Students in breach of their visa conditions may face serious consequences, including refusal of British visas in the future.

UK Visas and Immigration (UKVI) require students to collect their BRP within 10 days of arrival in the UK, from either the nearest approved Post Office (in the College’s case, High Street Kensington) or from the Registry team at the College. The pick up location depends on what the student has indicated in their visa application:

Students who select Imperial College as their location for collection will be emailed inviting them to book a slot so they can pick up their BRP, which they should be able to slot around their Departmental induction activity and programme timetable. The collection point is likely to be Sherfield Building.

For further information, please get in touch with the College’s International Student Support team.

http://www.imperial.ac.uk/study/international-students/.
31. Advice Services

You have access to a number of specialist advice services.

Imperial College Careers Service
The Careers Service has strong links to your Department and you will have a named Careers Consultant and Placement and Internship Adviser who will run both group sessions and individual meetings within your Department. You can arrange to meet with your linked Careers Consultant or Placement and Internship Adviser either in your Department or centrally on Level 5 Sherfield where the Careers Service is based.

Visit the Career Service’s website to:

- Book a careers appointment
- Find resources and advice on successful career planning.

www.imperial.ac.uk/careers

Department of Bioengineering Careers Adviser
Students in the Department of Bioengineering can also seek advice and help with career planning from Robert Ferguson, the Department’s Industrial Liaison Manager. Robert Ferguson works with a wide range of companies in the medical technology, healthcare and biotechnologies industries in the UK, EU and internationally. He can help you with your career plans in the world of Bioengineering through:

- Weekly employer presentations from companies in the Bioengineering sector
- The annual Bioengineering Careers Fair
- A database of information about companies operating in the Bioengineering sector
- Company and sector information
- Advice about job search and finding internships or Year in Industry opportunities.
- Help with applications and interviews.

You can find some specific information about careers in Bioengineering on the Department’s website at: http://www.imperial.ac.uk/bioengineering/study/career/.

Or if you have any questions or would like to arrange a meeting please contact Robert Ferguson directly: robert.ferguson@imperial.ac.uk.

Student Hub
The Student Hub represents a single point of contact for all key administrative information and support. The Student Hub team can help you with enquiries about:

- Accommodation (including checking contracts for private accommodation)
- Admissions
- International student enquiries
- Research degrees
- Student financial support
- Student records
- Tuition fees.

Level 3, Sherfield Building, South Kensington Campus
020 7594 9444
student.hub@imperial.ac.uk
www.imperial.ac.uk/student-hub
Library and IT

Information and Communications Technologies (ICT)
If you’re having problems with technology (including computers, laptops and mobile devices), you can get help from ICT’s Service Desk.

📞 020 7594 9000

🌐 www.imperial.ac.uk/ict/service-desk

Support with ICT
Any problems or queries relating to computing, including requests for new software, should be addressed first to ICT (service.desk@imperial.ac.uk) and to our IT Support Officer (Edit Toth, e.toth@imperial.ac.uk). To avoid infringement of licensing arrangements and to prevent the introduction of viruses, you are strictly forbidden to bring in programs from outside.

As long as you have completed Imperial’s online registration process, you can use your College credentials to get Microsoft Office 365 software for free. You can install the latest version of Microsoft Word, Excel, PowerPoint, OneNote and much more on up to five compatible PCs and Macs, plus five tablets, including iPad. All work can be saved online in OneDrive for Business, so it can be accessed no matter which device you use.

Rules for using the College network
The Information and Communication Technologies group (ICT) has very strict rules regarding the downloading of illegal, inflammatory, pornographic or obscene material onto computers connected to the campus network. Infringement of these rules can have very serious repercussions, including expulsion or legal proceedings being brought against students. You should be aware that the content and level of network traffic is monitored continuously. You should read the College’s Information Systems Security Policies, available at: http://www.imperial.ac.uk/admin-services/ict/self-service/be-secure/information-systems-security-policies/

Software shop
The Software shop offers a variety of general and subject-specific software programs and packages for free or at a discounted price for Imperial students.

🌐 www.imperial.ac.uk/admin-services/ict/shop/software

Library services
The Central Library at South Kensington is open around the clock pretty much all year. Make sure you find out who your departmental librarian is as they’ll be able to help you find resources for your subject area. Also, don’t forget to check out the Library’s range of training workshops and our other campus libraries for access to specialist medicine and life sciences resources. Alongside these physical spaces and resources, the Library provides over 170,000 electronic books, journals and databases available both on and off campus and a free document delivery service to help you source books and articles from around the UK and the rest of the world:

🌐 www.imperial.ac.uk/library
Religious support

The Chaplaincy Multi-Faith Centre has chaplains from many different religions, as well as prayer rooms and information on places of worship. In addition, it runs meditation classes and mindfulness workshops for stress management. There is a student-run Islamic prayer room on campus and separate areas available for male and female Muslims.

www.imperial.ac.uk/chaplaincy
The Student Records and Data Team are responsible for the administration and maintenance of the student records for all students studying at the College. This includes enrolments, programme transfers, interruption of studies, withdrawals and processing of examination entry for research degree students. The team also use this information to fulfil reporting duties to the Student Loans Company, Transport for London and the UKVI, as well as other external bodies.

The Team is responsible for the processing of student results and awards on the student record system as well as the production and distribution of academic transcripts and certificates of award.

The Student Records and Data Team produce a variety of standard document requests for both current and previous students including council tax letters, standard statements of attendance and confirmation of degree letters.

Feedback from students

The College and Union is committed to continually improving your education and wider experience and a key part of this is your feedback. Feedback is thoroughly discussed by your student representatives and staff.

We are committed to achieving and maintaining the highest standards in teaching on all programmes.

Programme quality
In the Department, the Teaching Committee regularly review modules and considers academic and peer review of lectures and classes.

Our Board of Examiners also have a role in ensuring the courses delivered are of a high quality. They undertake activities such as reviewing syllabi, lecture content, reading lists, coursework requirements, examination papers etc. Students from all years meet with the Board of Examiners once a year to present their views and opinions.

You can find out more about the role of external examiners on the website at: http://www.imperial.ac.uk/bioengineering/admin/current-ug/external-examiners/

At College level, high standards are maintained by the provision of staff development courses and the review of all taught components and formal examinations by the Programmes Committee. The programmes are subject to the College's quality assurance processes.

Many of our programmes are reviewed in detail and at regular intervals by the Professional Engineering Institutions to ensure that the high standards required for professional accreditation are maintained.

Student feedback
As students of the Department, you have a very important role to play, by communicating directly with members of staff or via Year or Departmental Representatives. As a cohort, you will be asked to elect year representatives who will sit on the Staff-Student Committee, work with the Departmental Student Representative, and provide valuable feedback. You can find out about the Staff-Student Committee on the website at: https://www.imperial.ac.uk/bioengineering/admin/current-ug/staff-student-committee/.

Formal routes by which students are involved in course evaluation are in the Staff-Student Committee (SSCM), which meets once a term, and in your completion of surveys. You will be given more information about how to complete these surveys later in the term. The surveys give you the opportunity to comment anonymously on the modules and the lecturers. It is very important that these are completed, since the feedback that they give to us is invaluable in improving the degree programme for you. Informally you are welcome to speak to lecturers, your Personal Tutor, the Academic Tutor or the Student Office. You can raise issues at any time – you don’t have to wait for the SSCM.

Ultimately - if there is something wrong please tell the Academic Tutor or the Student Office as soon as possible, so that we can fix it.

The Department’s “You Said, We Did” Campaign
You can find out more about what the Department has changed in response to student feedback by looking at our You Said, We Did webpage at: http://www.imperial.ac.uk/bioengineering/admin/current-ug/you-said-we-did/.
The Union’s “You Said, We Did” Campaign
You can find out more about some of the changes that have been made as a direct result of student feedback online, at https://www.imperialcollegeunion.org/you-said-we-did.

Student representation
Student Representatives are recruited from every department to gather feedback from students to discuss with staff. More information about the role, and instructions on how to become an academic representative, are available on the Imperial College Union (ICU) website.

www.imperialcollegeunion.org/your-union/your-representatives/academic-representatives/overview

Staff-Student Committee
Staff-Student Committees are designed to strengthen understanding and improve the flow of communication between staff and students and, through open dialogue, promote high standards of education and training, in a co-operative and constructive atmosphere. College good practice guidelines for staff-student committees are available here:

www.imperial.ac.uk/about/governance/academic-governance/academic-policy/student-feedback

In the Department of Bioengineering, the Staff-Student Committee meetings serve as a platform of exchange of students’ experience in the programmes; and for compiling the students’ complaints and suggestions. Staff also report implemented changes back to the students. In addition, all information is collected by the Student Union in order to present a global view of the College. Further, relevant issues raised at SSCM are discussed at the Departmental Teaching Committee Meeting, where academic staff discuss solutions.

Students from every year group of each degree programme are elected annually to serve as representatives. This could be you!

More details can be found here:

https://www.imperial.ac.uk/bioengineering/admin/current-ug/staff-student-committee/.
34. Student surveys

Your feedback is important to your department, the College and Imperial College Union.

Whilst there are a variety of ways to give your feedback on your Imperial experience, the following College-wide surveys give you regular opportunities to make your voice heard:

- UG SOLE lecture/module survey
- Student Experience Survey (SES).

The UG SOLE lecturer/module survey runs at the end of the autumn and spring terms. This survey is your chance to tell us about the modules you have attended and the lecturers who taught them. There are also separate surveys for your BPES and Horizon modules.

For UG SOLE your lecturers will receive their individual numerical results and comments shortly after the survey closes. To make the most of your opportunity to give your feedback, please do not use offensive language or make personal, discriminatory or abusive remarks as these may cause offence and may be removed from the results. While this survey is anonymous, please avoid self-identification by referring to personal or other identifying information in your free text comments.

The Student Experience Survey (SES) is another opportunity to leave your views on your experience. This survey will cover your induction, welfare, pastoral and support services experience.

The National Student Survey (NSS) is an annual survey of final year undergraduates at UK Higher and Further Education Institutions which runs in the spring term. It was first run in 2005 and is carried out by Ipsos Mori, commissioned by the Higher Education Funding Council for England.

When you are in the final year of your programme, you will be invited to take part in the National Students Survey (NSS). NSS asks all final year undergraduates to rate a range of elements related to their student experience such as academic support, learning resources and assessment and feedback. The nationwide survey compiles year-on-year comparative data for higher education institutions, with its results being made publicly available.

For Imperial’s results visit the Unistats website:

- unistats.direct.gov.uk/Institutions/Details/10003270

All these surveys are anonymous and the more students that take part, the more representative the results so please take a few minutes to give your views.

As a result of feedback to previous surveys, we have made a number of changes. Some examples of these are given on the Department’s “You Said, We Did” webpage:

http://www.imperial.ac.uk/bioengineering/admin/current-ug/you-said-we-did/

The Union’s “You Said, We Did” campaign shows you some of the changes made as a result of survey feedback:

- www.imperialcollegeunion.org/you-said-we-did

If you would like to know more about any of these surveys or see the results from previous surveys, please visit:

- www.imperial.ac.uk/students/academic-support/student-surveys/ug-student-surveys/

For further information on surveys, please contact the Registry’s Surveys Team at:

- surveys.registrysupport@imperial.ac.uk
Alumni services

When you graduate you will be part of a lifelong community of over 190,000 alumni, with access to a range of alumni benefits including:

- discounts on further study at the College and at Imperial College Business School
- alumni email service
- networking events
- access to the Library and online resources
- access to the full range of careers support offered to current students for up to three years after you graduate
- access to our Alumni Visitor Centre at the South Kensington Campus, with free Wifi, complimentary drinks, newspapers and magazines, and daytime left luggage facility.

Visit the Alumni website to find out more about your new community, including case studies of other alumni and a directory of local alumni groups in countries across the world.

www.imperial.ac.uk/alumni

Staying in touch

We really value all of our alumni and hope you will stay in touch with us as part of a lifelong connection in the College’s global community of over 180,000 alumni.

As a current student, you can find out about what alumni from the College do now by reading some case studies online: http://www.imperial.ac.uk/careers/resources/case-studies/alumni-case-studies/.

You can also find out more about alumni of the Department in the on the website at: http://www.imperial.ac.uk/bioengineering/people/alumni/alumni-spotlight/.

Attending Departmental and College events, public engagement events and other networking opportunities is also a good idea if you are interested in meeting alumni and expanding your network.

Opportunities for further study

After you have completed you MEng Biomedical Engineering degree, you may choose to continue your studies either at Imperial or elsewhere. Previous graduates have gone on to study for Master of Science (MSc), Master of Research (MRes) or doctorate (PhD) awards both in the Department of Bioengineering and elsewhere.
