

SSCP projects

Monitoring seismicity at volcanoes with geothermal prospects in Ethiopia	Ian Bastow, Derek Keir
Local earthquake analysis to reveal mud-volcano plumbing systems and slow slip mechanisms along the Hikurangi subduction zone, New Zealand	Bell, Bastow
Sustainable mine waste management: a closer look at dry stacking	Brito-Parada
Magmatism and Continental Breakup in the South Atlantic	Collier, Roberts, Lonergan
Tectonics of the North America/South America plate boundary	Collier, Henstock
Structure and tsunamigenic potential of the Lesser Antilles accretionary prism	Collier
New joint seismic tomography for the Africa plate and underlying mantle	Goes, Roberts
Understanding how subduction has shaped Circum-Pacific tectonics using 3D numerical models	Goes, Roberts
Transforming mine waste into a raw material for sustainable battery production	Hadler
Aquifer thermal energy storage for large-scale heating and cooling in the UK	M. Jackson
Global CO2 storage capacity: Modelling limitations of geography and injectivity	Krevor
Submarine channels, structural deformation and sediment delivery to the deep ocean	Lonergan
Development of high-resolution UAV-based hyperspectral imaging capability for mineral exploration at Quellaveco mining district in Peru	Mason
Multi-parameter geophysical imaging of Santorini Volcano	Morgan, Paulatto
Testing the core-mantle-boundary & large igneous province hypothesis: a full-vector palaeomagnetic study of the North Atlantic Igneous Province	Muxworthy
Biomagnetic Monitoring For Urban Air Quality Assessment	Muxworthy
Understanding How Serpentinisation Affects Marine Magnetic Anomalies	Muxworthy, Collier
High resolution 3D imaging of an oceanic core complex: interaction of magma, water and faults on the mid-Atlantic ridge	Paulatto, Morgan
Multi-scale characterization of water flow in submarine hydrothermal systems	Paulatto, Krevor, Jacquemyn, Jackson
Accelerating Scientific Discovery of Complex Scientific Applications with Process-Guided Deep Learning: Aquatic Eco-Dynamics in Lakes	Piggott
Ocean deoxygenation: what are the biogeochemical implications, are there mitigation options?	Plancherel
ElementTracker: a digital framework to track elemental flows through the global economy	Plancherel
Modeling the global Pb cycle: from industrial emissions to the bottom of the ocean	Plancherel
Understanding modern biogeochemical cycles in the context of the international GEOTRACES project - Lead, zinc, cadmium and neodymium isotopes	Rehkamper, Van de Flierdt, Plancherel
Cadmium Enrichment in Cocoa Beans - A Stable Isotope Investigation of Cd Sources and Mitigation Strategies	Rehkamper, Maurice
The transition metal isotope signatures of metalloproteins	Rehkamper
Environmental effects and fate of engineered nanomaterials	Rehkamper, Svendsen
The importance of glaciated environments for seawater chemistry and the global carbon cycle – a case study from Greenland	Van de Flierdt, Little, Hendy
Environmental Pollution as a Marine Tracer - Measuring and Modelling Anthropogenic Lead in the Indian Ocean	Van de Flierdt, Plancherel, Rehkamper
Tectonics from topography in Central Greece: decoding the history of fault growth and landscape evolution in the Corinth Rift	Whittaker
The origin of propylitic alteration halos in porphyry systems	Wilkinson
Developing UV-Fluorescence Spectroscopy as a Tool for Mineral Exploration	Wilkinson
Residence and mobility of metals in the alteration zones of porphyry ore systems	Wilkinson
