UNIVERSITY OF COLOGNE

DYNAVERSE

UNIVERSITÄT BONN

Dynaverse Summer Research Internship

“Dynaverse – Our Dynamic Universe” is a Cluster of Excellence bringing together researchers from the Universities of Cologne and Bonn, Forschungszentrum Jülich, the Max Planck Institute for Radio Astronomy, the German Aerospace Center (DLR), and the Heidelberg Institute for Theoretical Studies. By combining astrophysics, computer science, and mathematics, Dynaverse aims to unravel how our Universe evolves across vastly different timescales, using cutting-edge observations, laboratory experiments, simulations, and artificial intelligence.

INTERNSHIP

The funded Dynaverse Summer Internship lasts 2–3 months in 2027. As an intern, you will have the opportunity to contribute to exciting research projects, gain practical research experience, and work in an international, interdisciplinary scientific environment.

APPLICATION

International and German students who will have completed at least four semesters in physics, astrophysics, or a related field by the start of the internship can apply. Previous research experience is not required.
Application deadline: 15 November 2026
