

Please rank the following ten priorities that could be taken by national/local government and the NHS to increase Health Equity.

44 Responses

Top 3 Priorities

1

Increase the weighting given to Health Inequalities in the funding of Integrated Care Boards

2

Better data on access and outcomes broken down by income and background

3

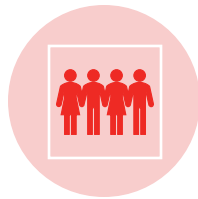

Ensure that Health Equity is considered by the NHS in the services and products it buys

Embedding change

Innovation and change do not happen in isolation – we need to create the conditions for success

Ensure that all our systems, monitoring and incentives work to the same goals across our systems

Create a community of experts and an evidence base that leads to better commissioning

Make it easy to share good practice, learn lessons and connect with teams who have made a real difference

Create systems that have standardised processes but implement responsive services

Be clear on ring fencing monies and that we are offering alternatives that cost less (globally).

Design all our services with technology and provide alternatives
