

Michelle Cadby

Language(s) spoken: English

Role: Project Manager within the Gene Therapy Group at NHLI and based in the Guy Scadding Building

Bio: I became a Mental Health First Aider to support efforts in raising awareness and reducing the stigma around mental health. I believe everyone should feel safe and supported talking about their wellbeing and that a small conversation can make a big difference.

Outside of work, I enjoy spending time with my family, exercising (when time allows) and being outdoors and in nature.
