

Name: Rumi Jones

Age: 23

Course: MRes Biomedical
Science

Bio

Rumi has limited work/life experience and is studying for a masters, “just because...”. She has an idea that she “needs” a masters and has moved directly from undergraduate study to a taught Masters. She is academically inclined and is both excited and anxious about her PG studies but has very limited experience in active decision making, particularly in relation to her own progression.

Goals

- Doesn't know

Frustrations

- Lack of support for identifying goals.
- Lack of time

Motivations

Knowing exactly what sort of job she'd like to do (confidence)

Concern about what comes after university studies (fear)

Seeking opportunities to develop and learn (growth)
