To increase the discoverability of your data or code deposit, you should enter metadata describing it into the College repository, Spiral, via Symplectic at:

imperial.ac.uk/SymplecticElements/

Are you entering metadata about a dataset, software or code?

Log into Symplectic and select '+ add' publication. Select 'dataset' and fill out the required fields on the form including a DOI and license type.

Log into Symplectic and select '+ add' publication. Select 'software / code' and fill out the required fields on the form including a DOI and license type.

The metadata you enter about your deposit will feed through into the Imperial College repository, Spiral. This will increase the discoverability and citability of your dataset, software or code as Spiral is indexed by various search engines.
