

CASC-IC

CASC started in July 2008 with EPSRC funding (£5.5M) for a five-year program. The EPSRC funding came to an end in June 2013, but CASC continues to prosper. CASC has attained a large number of active industrial collaborations from abroad and in the UK. An Industrial Consortium (IC) is running now with leading ceramics industries from all across the world.

Industrial Consortium (IC)

CONNECTING YOUR BUSINESS TO THE
TECHNOLOGY RESOURCES YOU NEED

A key part of CASC's sustainability is the development of a consortium of companies with interest in manufacture or use of structural ceramics. To build on CASC's early success and to build long-term and fruitful relationships between CASC-associated academics and the UK's industrial structural ceramics community we have set up an industry consortium scheme. The Industrial Consortium develops the CASC Business Plan which contains the Centre vision, objectives and an action plan to deliver them.

It acts in an advisory role to the Director and to the Local Management Team, in particular providing advice on:

- The strategic research focus of the centre.
- The infrastructure, skills needs and links to industry and other research groups worldwide.
- The structure and content of any undergraduate and postgraduate courses provided by the centre.

TECHNICAL SOLUTIONS FOR YOUR INDUSTRY NEEDS

Membership Benefits

	Diamond	Sapphire	Ruby
Type of Membership	Strategic	Research & Training	Research & Training
Steering Group Member	Yes	Yes	Yes
Equipment use			
Free allowance up to:	£10,000	£3,000	No
Preferential rate for other use	Yes	Yes	Yes
Proposing MSc, BEng and MEng projects	8	2	1
Access to CV's of graduating students	Yes	Yes	Yes
Free Summer School Positions	10	3	1
Membership fee	£50,000+VAT	£15,000+VAT	£5,000+VAT

DIAMOND MEMBERSHIP

Diamond membership is aimed at large and multinational companies, who would like strategic advice and board-level interaction with senior academic staff at CASC. The relationship, which might include technical briefings and RAEng Industrial Fellowships, would be tailored to individual company requirements.

CONTACT:

For more information about the benefits of membership of CASC's Industry Consortium, please contact:
Prof. Eduardo Saiz (e.saiz@imperial.ac.uk)
or Alba Matas Adams (amatasad@ic.ac.uk)

SAPPHIRE AND RUBY MEMBERSHIP

Sapphire and Ruby memberships are aimed at smaller companies who want to collaborate with CASC on research and training; Sapphire membership offers greater benefits than Ruby membership.

Current members:

John Crane, Asahi Glass, Morgan Advanced Materials, Reaction Engines and SAFRAN
