Good Laboratory Practice

Good laboratory practice must be applied at all times. It ensures that activities do not represent any significant risks to the operative or others in or entering the lab.

DO
- Wear a clean lab coat, suitable clothing to prevent direct skin exposure, enclosed footwear and protective gloves as appropriate.
- Use lab equipment and generic protocols as instructed.
- Clean up spillages immediately.
- Wash hands when leaving the laboratory.
- Regularly decontaminate work areas and follow good general housekeeping practices.
- Follow the correct waste disposal routes.
- Disinfect all biological material according to the risk assessment.
- Report any faults with laboratory or equipment to James Mansfield.
- Report all accidents or near misses online using the College incident reporting mechanism: http://www3.imperial.ac.uk/safety/subjects/reportingaccidents/reportinganincident

DO NOT
- Eat or drink in the laboratory

James Mansfield will
- Report any building faults to Estates Facilities (ext 48000 or fm.csc@imperial.ac.uk)
