Using Panopto “Views by Video Time” Statistics

Within Panopto you can view statistics which show which parts of each recording have been viewed most frequently. This makes it possible to identify areas of difficulty for students.

To access Panopto recording statistics
In Panopto ([https://imperial.cloud.panopto.eu](https://imperial.cloud.panopto.eu)), navigate to the recording of interest.

It is best to open the recording in a new window, by right-clicking on the blue recording title and then left-clicking on Open link in new window.

Then hover over the blue recording title in the original window to reveal the menu and click on the Stats button as shown here to display the statistics.

Resize the two windows so that they can be viewed side-by-side.

The statistics will display as in the following screen:

Note that by default, the Past Month will be displayed. Click on the text below the graph to see the All Time view.

The Views by Week graph shows the number of views for a recording and the number of minutes it is viewed for.

The Views by Video Time graph allows the review of the time line of a recording, showing the number of views through the duration of the recording. This is useful for analysing how frequently parts of the recording are viewed.
The graph shows that the content, 3 minutes and 59 seconds into the recording, was viewed by 40 people.

This part of the recording can be reached quickly by clicking and dragging the blue circular play head (scrubbing) as highlighted below:
