

Professional Understanding Questionnaire

This questionnaire, developed by Dall'Alba (1998) consists of **only two open-ended items** (although demographic data about the respondent is also often collected).

1. *Give an example of a concrete situation which shows what you think is central to the work of a [medical doctor]. Please answer in as much detail as you can – there is no word limit.*
2. *Give an example of a concrete situation in a [medical doctor's] daily work that you think can be difficult to deal with. Please answer in as much detail as you can – there is no word limit.*
