

Global Fellows Programmes: Learning Outcomes

Topics covered in this programme include:

- Creating new networks and learning about other research institutions
- Effective international team working
- Creativity and the development of collaborative research ideas
- Effective communication with impact
- Current research into Cities of the Future

At the end of this programme attendees will have developed:

- Their appreciation of research in different institutions (posters and networking)
- Their ability to work well in interdisciplinary teams (team activities)
- Their intercultural and international competency (networking and team activities)
- Their ability to work collaboratively on research ideas (project)
- Their awareness of Cities of the Future research (academic content)

Links are made to the research environment and participants are encouraged to apply the new insights gained from the programme to their doctoral study at Imperial College
