## Specification Details

- **Student cohorts covered by specification**: 2017-18 entry
- **Person(s) responsible for the specification**: Dr Philip Miller, Course Director
- **Date of introduction of programme**: October 2005
- **Date of programme specification/revision**: April 2018

## Programme Overview

This document provides a definitive record of the main features of the programme and the learning outcomes that a typical student may reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities provided. This programme specification is intended as a reference point for prospective students, current students, external examiners and academic and support staff involved in delivering the programme and enabling student development and achievement.
Bioimaging sciences have played a vital role in improving human life. A wide range of imaging techniques, such as magnetic resonance imaging (MRI), positron emission tomography (PET), ultrasound and optical imaging, are now important tools for the early detection of disease, understanding basic molecular aspects of living organisms and the evaluation of medical treatment.

This one-year MRes course covers the fundamentals of modern imaging methodologies, including their techniques and application within medicine and the pharmaceutical industry, along with the chemistry behind imaging agents and biomarkers.

Imperial’s research strength in imaging sciences is recognised both nationally and internationally, as exemplified by the creation of Imperial's Imaging Sciences Centre (ISC).

The course will progress interdisciplinary development in imaging sciences and create a multidisciplinary team involving chemists, immunologists, radiologists, image scientists, physicists, biomedical scientists and computer scientists.

Learning Outcomes

The Imperial Graduate Attributes are a set of core competencies which we expect students to achieve through completion of any Imperial College degree programme. The Graduate Attributes are available at: www.imperial.ac.uk/students/academic-support/graduate-attributes

The main outcome of the programme is to provide opportunities for postgraduate students to develop and demonstrate knowledge and understanding, qualities, skills and other attributes.

The programme aims to:

- Produce physical sciences postgraduates equipped to pursue careers at the interface between the physical and life sciences (imaging related areas), in industry, the public sector and non-governmental organisations;
- Develop the ability to undertake research in multidisciplinary teams at this interface;
- Develop a knowledge of a range of basic and advanced bioimaging concepts;
- Develop research and analytical skills related to bioimaging research;
- Develop oral and written scientific presentation skills;
- Attract the most motivated physical sciences graduates, both from within the UK and from overseas;
- Develop new areas of teaching in response to the advance of scholarship and the needs of vocational training.

Considering the above aims, the main outcome of the programme is to provide opportunities for postgraduate student

Knowledge and Understanding:

- Core and specialised concepts in imaging science – positron emission tomography (PET), single photon emission tomography (SPECT), magnetic resonance imaging (MRI), optical imaging (Bioluminescence, FLIM), ultrasound, pharmacology, anatomy-physiology, image computation, the chemistry of imaging;
- Research techniques, including information retrieval, experimental design and statistics, modelling, sampling, bioimaging techniques, molecular characterisation, and laboratory safety;
- Detailed knowledge and understanding of the essential facts, concepts, principles and theories relevant to the student’s project;
- Management and communication skills, including problem definition, project design, decision processes, teamwork, written and oral reports, scientific publications.

**Intellectual Skills - able to:**
- Analyse and solve bioimaging problems using an integrated multidisciplinary approach;
- Integrate and evaluate information;
- Formulate and test hypotheses;
- Plan, conduct and write-up a programme of original research.

**Practical Skills - able to:**
- Plan and execute safely a series of experiments or computations;
- Use laboratory methods or computer-based tools to generate data;
- Analyse results, determine their strength and validity, and make recommendations;
- Prepare technical reports;
- Give technical presentations;
- Use the scientific literature effectively.

**Transferable Skills - able to:**
- Communicate effectively through oral presentations, computer processing and presentations, and written reports;
- Apply knowledge and modelling skills;
- Management skills: decision processes, objective criteria, problem definition, project design and evaluation needs;
- Integrate and evaluate information from a variety of sources;
- Transfer techniques and solutions from one discipline to another;
- Use Information and Communications Technology;
- Manage resources and time;
- Learn independently with open-mindedness and critical enquiry;
- Learn effectively for the purpose of continuing professional development.

## Entry Requirements

<table>
<thead>
<tr>
<th>Academic Requirement</th>
<th>Normally a 2.1 UK Bachelor’s Degree with Honours in a science, technology, engineering or medicine subject (or a comparable qualification recognised by the College) (or a comparable qualification recognised by the College).</th>
</tr>
</thead>
<tbody>
<tr>
<td>English Language Requirement</td>
<td><a href="http://www.imperial.ac.uk/chemistry/postgraduate/mres-courses/">Standard requirement</a> IELTS score of 6.5 overall (minimum 6.0 in all elements)</td>
</tr>
</tbody>
</table>

The programme’s competency standards document can be found at: [http://www.imperial.ac.uk/chemistry/postgraduate/mres-courses/](http://www.imperial.ac.uk/chemistry/postgraduate/mres-courses/)

## Learning & Teaching Strategy

| Scheduled Learning & Teaching Methods | Lectures  
Seminars  
Workshops |
### Project Learning Methods
- Individual research project

### Assessment Strategy

<table>

</tr>
<tr>
<td>• Reports</td>
</tr>
<tr>
<td>• Presentations</td>
</tr>
<tr>
<td>• Practical work</td>
</tr>
</tbody>
</table>

### Academic Feedback Policy

Feedback will be provided within 2 weeks for small pieces of coursework (journal clubs, poster project) and within 3 weeks for larger assessments (research proposal, bespoke courses). For lectures courses attended alongside final year UG (MSci) students, feedback will be provided at the same time as for the MSci students. In all cases, the MRes students will be provided with information on when they can expect the feedback to be provided. If there is any delay, the students will be informed.

### Re-sit Policy

In line with College policy, students who are unsuccessful in any of their examinations may usually be allowed an opportunity to re-sit at the discretion of the Board of Examiners.

Specific information regarding re-sits for Taught Master’s degrees can be found in the relevant Academic Regulations available at: [https://www.imperial.ac.uk/about/governance/academic-governance/regulations/](https://www.imperial.ac.uk/about/governance/academic-governance/regulations/)

### Mitigating Circumstances Policy

Students may be eligible to apply for mitigation if they have suffered from serious and unforeseen circumstances during the course of their studies that have adversely affected their ability to complete an assessment task and/or their performance in a piece of assessment.

The College’s Policy on Mitigating Circumstances is available at: [https://www.imperial.ac.uk/about/governance/academic-governance/academic-policy/exams-and-assessment/](https://www.imperial.ac.uk/about/governance/academic-governance/academic-policy/exams-and-assessment/)

### Assessment Dates & Deadlines

**Practical Assessments**

**Assessment Structure**

**Marking Scheme**

**Pass:** to be awarded where a candidate has achieved:

- Achieve an aggregate mark of at least 50% in each module
- Achieve a mark of at least 50% in the individual project
- Achieve an aggregate mark of at least 50% for the programme as a whole

**Merit:** to be awarded where a candidate has achieved:

- Achieve an aggregate mark of at least 60% in each module
- Achieve a mark of at least 60% in the individual project
- Achieve an aggregate mark of at least 60% for the programme as a whole. A student who fails to meet this requirement may be Compensated. Compensation is awarded at the discretion of the Board of Examiners and only in accordance with paragraph 14.2 of the Regulations for the Examination of Master’s Level Degrees.

**Distinction:** to be awarded where a candidate has achieved:

- Achieve an aggregate mark of at least 70% in each module
- Achieve a mark of at least 70% in the individual project
- Achieve an aggregate mark of at least 70% for the programme as a whole. A student who fails to meet this requirement may be Compensated. Compensation is awarded at the discretion of the Board of Examiners and only in accordance with paragraph 14.2 of the Regulations for the Examination of Master’s Level Degrees.
