

MRes Cancer Biology
MRes Cancer Biology (Cancer Informatics)

This document provides a definitive record of the main features of the programme and the learning outcomes that a typical student may reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities provided. This programme specification is intended as a reference point for prospective students, current students, external examiners and academic and support staff involved in delivering the programme and enabling student development and achievement.

Programme Information				
Programme Title	Cancer Biology		Cancer Biology (Cancer Informatics)	
Award(s)	MRes			
Programme Code	A3CB	A3CBI		
Associateship	None			
Awarding Institution	Imperial College London			
Teaching Institution	Imperial College London			
Faculty	Faculty of Medicine			
Department	Department of Surgery and Cancer			
Mode and Period of Study	1 academic year, full time (12 months)			
Cohort Entry Points	Annually in October			
Relevant QAA Benchmark Statement(s) and/or other external reference points	N/A			
Total Credits	ECTS:	90	CATS:	180
FHEQ Level	Level 7			
EHEA Level	2 nd cycle			
External Accrator(s)	None			
Specification Details				
Student cohorts covered by specification	2016-17 entry			
Person responsible for the specification	Dr Olivier E Pardo			
Date of introduction of programme	2009			
Date of programme specification/revision	June 2016			

Description of Programme Contents

The course comprises an initial eight week taught component in which the cellular and molecular basis of cancer biology is covered plus an introduction to the clinical and pathological aspects of carcinogenesis. Within this period will also be a series of workshops covering key transferable skills such as oral presentation of scientific data and grant writing.

This is followed by two separate 19-week research placements within the recently created Imperial College Cancer Research UK Centre, the Faculty of Medicine at the Hammersmith Hospital campus of Imperial College and other collaborating institutes across London (Sciences, Cancer).

Some of the laboratories within the Division of Cancer in which you can do your research project can be found under "Cancer Research" at the Department of Surgery and Cancer.

The course comprises both theoretical and practical elements, embracing cutting-edge developments in the field. Students will experience some of the most technologically advanced approaches currently being applied to the broad field of cancer research.

This course offers an additional stream, Cancer Informatics. The format of the stream and assessment method is the same for all students, but the core programme and choice of research projects are determined by stream, i.e. Cancer Biology or Cancer Informatics.

Learning Outcomes

The Imperial Graduate Attributes are a set of core competencies which we expect students to achieve through completion of any Imperial College degree programme. The Graduate Attributes are available at: www.imperial.ac.uk/students/academic-support/graduate-attributes

Knowledge and Understanding of:

- Issues that are currently topical in molecular, cellular and physiological science;
- Management and communication skills, including problem definition, project design, decision processes, teamwork, written and oral reports, scientific publications;
- Ethics of animal and human experimentation;
- Intellectual property issues;
- The principles and practice of modern molecular, cellular and physiological science through both theory and practical exposure;
- Advanced practical techniques of molecular, cellular and physiological science;
- Research techniques including information retrieval, experimental design, statistics and laboratory safety.

Intellectual Skills:

- Critically evaluate current developments in the fields of molecular, cellular and physiological science using an integrated multidisciplinary approach involving a number of scientific disciplines;
- Integrate and evaluate information;
- Formulate and test hypotheses using appropriate experimental design and statistical analysis of data;
- Plan, conduct and write-up two independent programmes of original research.

Practical skills:

- Plan and execute safely a series of experiments;
- Use laboratory methods to generate data;
- Analyse experimental results and determine their strength and validity;
- Prepare technical reports;
- Give technical presentations;
- Use the scientific literature effectively;
- Use computational tools and packages.

Transferable Skills:

- Communicate effectively through oral presentations, computer processing and presentations, written reports and scientific publications;
- Apply statistical and modelling skills;
- Management skills: decision processes, objective criteria, problem definition, project design and evaluation, risk management, teamwork and coordination;
- Integrate and evaluate information from a variety of sources;
- Transfer techniques and solutions from one discipline to another;
- Use Information and Communications Technology;
- Manage resources and time;
- Learn independently with open-mindedness and critical enquiry;
- Learn effectively for the purpose of continuing professional development.

Entry Requirements

Academic Requirement	Normally a 2:1 UK honours degree or equivalent in an appropriate science subject.
Non-academic Requirements	Relevant lab experience
English Language Requirement	Higher Requirements: IELTS 6.5 with a minimum of 6.0 in each element or equivalent.

The programme's competency standards documents can be found at:

<http://www.imperial.ac.uk/students/academic-support/graduate-attributes/>

Learning & Teaching Strategy

Scheduled Learning & Teaching Methods	<ul style="list-style-type: none"> • Lectures • Seminars • Tutorials • Technical workshops
E-learning & Blended Learning Methods	<ul style="list-style-type: none"> • N/A
Project and Placement Learning Methods	<ul style="list-style-type: none"> • Research projects

Assessment Strategy	
Assessment Methods	<ul style="list-style-type: none"> • Coursework • Practical
Academic Feedback Policy	
<p>Both individual and group feedback is provided following all coursework, practical and project viva involving all internal examiners. Personal tutors will be able to assist students to monitor progress throughout the course based on this feedback.</p> <p>Students will receive literal grades for their assignments within a month of the assignment deadline. The research projects will be assessed at different stages with the academic supervisors providing input into methodologies and interpretation of results. Also, for the first research project, a mock viva is organised a month and a half prior to the real viva in order to provide feedback to the students prior to the first course viva.</p>	
Re-sit Policy	
The College's Policy on Re-sits is available at: www.imperial.ac.uk/registry/exams/resit	
Mitigating Circumstances Policy	
The College's Policy on Mitigating Circumstances is available at: www.imperial.ac.uk/registry/exams	
Assessment Structure	
Marking Scheme	
<p>The Pass Mark for all elements is 50%.</p> <p>Students must pass all elements including the statistics, bioinformatics and grant writing exercises in order to be awarded a degree.</p> <p>Final Degree Classifications</p> <p>In order to be awarded a result of pass, a candidate must obtain an aggregate mark of at least 50%.</p> <p>In order to be awarded a result of merit, a candidate must obtain an aggregate mark of 60% or greater.</p> <p>In order to be awarded a result of distinction, a candidate must obtain an aggregate mark of 70% or greater.</p> <p>Where appropriate, a Board of Examiners may award a result of merit where a candidate has achieved an aggregate mark of 60% or greater across the programme as a whole AND has obtained a mark of 60% or greater in each element with the exception of one element AND has obtained a mark of 50% or greater in this latter element.</p> <p>Where appropriate, a Board of Examiners may award a result of distinction where a candidate has achieved an aggregate mark of 70% or greater across the programme as a whole AND has obtained a mark of 70% or greater in each element with the exception of one element AND has obtained a mark of 60% or greater in this latter element.</p>

Imperial College is an independent corporation whose legal status derives from a Royal Charter granted under Letters Patent in 1907. In 2007 a Supplemental Charter and Statutes was granted by HM Queen Elizabeth II. This Supplemental Charter, which came into force on the date of the College's Centenary, 8th July 2007, established the College as a University with the name and style of "The Imperial College of Science, Technology and Medicine".
