Updated December 2021

Contents
(1) Papers in journals
(2) Book chapters
(3) Commissioned reports
(4) Letters

(1) Papers

Lewis J, Price MJ, Horner PJ, White PJ. Genital *Chlamydia trachomatis* infections clear more slowly in men than women, but are less likely to become established. *Journal of Infectious Diseases* 2017; 216(2): 237–244. doi.org/10.1093/infdis/jix283. PMID: 28838150 [accepted 6 June 2017; online 13 June 2017]

Metzig C, Surrey J, Francis M, Conneely J, Abubakar I, White PJ. Impact of Hepatitis C Treatment as Prevention for People Who Inject Drugs is sensitive to contact network structure.

Smieszek T, Castell S, Barrat A, Cattuto C, White PJ, Krause G. Contact diaries versus wearable proximity sensors in measuring contact patterns at a conference: method comparison and participants’ attitudes.

Smieszek T, White PJ. Apparently-different Clearance Rates from Cohort Studies of Mycoplasma genitalium are Consistent after Accounting for Incidence of Infection, Recurrent Infection, and Study Design.

Grad YH, Goldstein E, Lipsitch M, White PJ. Improving control of antibiotic resistant gonorrhoea by integrating research agendas across disciplines: key questions arising from mathematical modeling.

**Health Technology Assessment** 2015; 19(34). doi.org/10.3310/hta19340. PMID: 25952553  

**Health Technology Assessment** 2015; 19(5). doi.org/10.3310/hta19050. PMID: 25619445  
http://www.nets.nihr.ac.uk/projects/hta/074301 [online Jan 2015]

**PLOS ONE** 2014; 9(12): e114637. doi.org/10.1371/journal.pone.0114637. PMID: 25494180 [10 Dec 2014]

Aldridge RW, Yates TA, Zenner D, White PJ, Abubakar I, Hayward AC. Pre-entry screening programmes for tuberculosis in migrants to low-incidence countries: a systematic review and meta-analysis.  
**Lancet Infectious Diseases** 2014; 14: 1240–1249. doi.org/10.1016/S1473-3099(14)70966-1. PMID: 25455991 [online 7 Nov 2014]

**Journal of Infectious Diseases** 2014; 210(suppl 2): S586–S593. doi.org/10.1093/infdis/jiu482. PMID: 25381379 [online 7 Nov 2014]

**Journal of Infectious Diseases** 2014; 210(suppl 2): S569–S578. doi.org/10.1093/infdis/jiu493. PMID: 25381377 [online 7 Nov 2014]

Pelat C, Ferguson NM, White PJ, Reed C, Finelli L, Cauchemez S, Fraser C. Optimizing the Precision of Case fatality Ratio Estimates under the Surveillance Pyramid Approach.  

Todd S, Diggle PJ, White PJ, Fearne A, Read, JM. The spatiotemporal association of non-prescription retail sales with cases during the 2009 influenza pandemic in Great Britain.  

reviews and mathematical modelling.

*Health Technology Assessment* 2014; 18(2): 1–100. doi.org/10.3310/hta18020. PMID: 24411488

http://www.journalslibrary.nihr.ac.uk/hta/volume-18/issue-2  [Jan 2014]

*Sexually Transmitted Infections* 2011; 87(7): 629–634. doi.org/10.1136/sti.2010.045500. PMID: 21685191. [Dec 2011; online 16 Jun 2011]

Different transmission patterns in the early stages of the influenza A(H1N1)v pandemic: a comparative analysis of 12 European countries.

Keeling MJ, **White PJ**. Targeting vaccination against novel infections: risk, age and spatial structure for pandemic influenza in Great Britain.

Dodd PJ, **White PJ**, Garnett GP. Notions of synergy for combinations of interventions against infectious diseases in heterogeneously mixing populations.

Eames KT, Tilston NL, **White PJ**, Adams E, Edmunds WJ. The impact of illness and the impact of school closure on social contact patterns.

**PLOS Medicine** 2010; 7(6): e1000275. doi.org/10.1371/journal.pmed.1000275. PMID: 20532237. [22 Sep 2010; online 1 Feb 2010]

Epidemiology 2010; 18799491. [10 Mar 2009; online 8 Sep 2009]

Walker PT, Hallett TB, White PJ, Garnett GP. Interpreting declines in HIV prevalence: impact of spatial aggregation and migration on expected declines in prevalence.

Sexually Transmitted Infections 2007; 83: 400–405. doi.org/10.1136/sti.2006.024554. PMID: 17475683. [1 Aug 2007; online 2 May 2007]

**White PJ**, Garnett GP. Use of antiviral treatment and prophylaxis is unlikely to have a major impact on the prevalence of herpes simplex virus type 2. *Sexually Transmitted Infections* 1999; 75: 49–54. doi.org/10.1136/sti.75.1.49. PMID: 10448343. [Feb 1999]

White PJ. Borts RH, Hirst MC. Stability of the human fragile X (CGG)n triplet repeat array in *Saccharomyces cerevisiae* deficient in aspects of DNA metabolism.

Hirst MC, White PJ. Cloned human FMR1 trinucleotide repeats exhibit a length and orientation dependent instability suggestive of *in vivo* lagging strand secondary structure.

(2) Book chapters

White PJ. Mathematical models in infectious disease epidemiology.

Jit M, White P. Economic analysis of interventions against infectious diseases.

White PJ. Epidemiology of STI and HIV: An Overview of Concentration and Geographical and Temporal Dispersion.

White PJ, Garnett GP. Mathematical Modelling of the Epidemiology of Tuberculosis.

White PJ, Enright MC. Mathematical models in infectious disease epidemiology.

Swinton J, ... White PJ, Wilson, K. Microparasite transmission and persistence.

(3) Commissioned reports

White P, Jit M. What is the cost-effectiveness of latent tuberculosis infection (LTBI) treatment with different regimens?

Informs NICE guidance: “Tuberculosis. NICE guideline, NG33”, issued: January 2016; http://nice.org.uk/guidance/ng33
White P. Review of the methodology of calculation of the expected epidemiological and economic achievements of the implementation of the M/XDR-TB Action Plan. 

(4) Letters

White PJ, Lewis J, Horner PJ. Management of asymptomatic *Mycoplasma genitalium* to mitigate the threat of drug resistance. 
*Sexually Transmitted Infections* 2020; [https://sti.bmj.com/content/96/6/464.responses#management-of-asymptomatic-mycoplasma-genitalium-to-mitigate-the-threat-of-drugs-resistance](https://sti.bmj.com/content/96/6/464.responses#management-of-asymptomatic-mycoplasma-genitalium-to-mitigate-the-threat-of-drugs-resistance) [online 10 Nov 2020]

*Epidemiology and Infection* 2019; 147: e273. doi.org/10.1017/S0950268819001584. PMID: 31537206 [accepted 15 Aug 2019; online 20 Sep 2019]

*Epidemiology and Infection* 2019; 147: e271. doi.org/10.1017/S0950268819001572. PMID: 31537203 [accepted 8 Aug 2019; online 20 Sep 2019]

White PJ, Lewis J. Estimating chlamydia prevalence: more difficult than modelling suggests – Authors’ reply. 
*Lancet Public Health* 2018; 3(9): e417. doi.org/10.1016/S2468-2667(18)30129-4. PMID: 30193696 [accepted 24 July 2018; online 5 Sep 2018]

Whittles LK, Didelot X, Grad YH, White PJ. Testing for gonorrhoea should routinely include the pharynx. 

White PJ, Abubakar I. Hepatitis C virus treatment as prevention in people who inject drugs. 
*Lancet Infectious Diseases* 2018; 18(4): 379. doi.org/10.1016/S1473-3099(18)30130-0. PMID: 29582763 [accepted 2 Feb 2018; online 22 Mar 2018]

Bradshaw CS, Horner PJ, Jensen JS, White PJ. Syndromic management of sexually-transmitted infections and the threat of untreatable *Mycoplasma genitalium*.

White PJ. Increases in gonorrhoea incidence and GUM clinic waiting times: are we in a vicious circle like the late 1990s and early 2000s, but now exacerbated by drug resistance? *Sexually Transmitted Infections* 2017; 93: 471. doi.org/10.1136/sextrans-2017-053242. PMID: 29061695 [accepted 29 Apr 2017; online 23 Oct 2017]
